Introduction

The U.S. financial services industry, in coordination with applicable regulators, will implement a shortened settlement cycle for most U.S. financial products from current trade date plus two business days (T+2) to trade date plus one business day (T+1) on May 28, 2024.

The move to a shorter settlement cycle has been a multi-year industry initiative, during which DTCC has published several documents to assist Members in preparing for the transition to a T+1 settlement cycle. This includes DTCC's document on the [T+1 DTC, NSCC, and ITP Functional Changes](#), which outlined the systems and processing changes required to move to a one day settlement for DTCC's subsidiaries – DTC, NSCC and ITP, as well as the [T+1 DTCC Detailed Testing Framework Document](#) to provide Members with a detailed plan for testing T+2 changes with DTCC and other industry infrastructures. (Note, these documents are available on the Industry's T+1 website, www.ust1.org.)

The purpose of this paper is to provide Members with a comprehensive guide on the steps DTCC will take during the T+1 conversion process, along with changes that will be effective upon implementation of the T+1 settlement cycle on May 28, 2024. This paper includes information on:

- DTCC's timeline to deploy its T+1 functional changes into the Production environment (timeline to convert its Production environment from a T+2 to a T+1 settlement cycle environment)
- DTCC's systems and processing changes for T+1
- DTCC's Member support during the T+1 conversion period

DTCC'S Implementation Schedule

The implementation of a T+1 settlement cycle will require systemic and processing changes at DTCC's Subsidiaries – DTC, NSCC and ITP, as defined in DTCC's DTC, NSCC, and ITP Functional Changes Document.

DTCC's Production environment will conform to a T+2 settlement cycle until close of business Friday, May 24, 2024, and will be fully converted into a T+1 settlement cycle environment prior to the start of business on Tuesday May 28, 2024.

DTCC's conversion process will be transparent to Members. DTCC will begin to deploy its T+1 coding changes into the Production environment after close of business on Friday May 24, 2024, (as DTC, NSCC and ITP processes complete and outputs are distributed) and will conclude the process before the start of business on Tuesday May 28, 2024.

DTCC's internal T+1 conversion process will be fully supported by a robust implementation plan and schedule for the technical deployment of T+1 codes into the Production environment. Throughout the conversion period, DTCC is committed to rigorously monitoring its processes, tracking, and reporting status to Members at regularly scheduled intervals and on an ad hoc basis, as needed.

The T+1 Industry Steering Committee (ISC) is also preparing communication plans for the T+1 conversion period and DTCC's regularly scheduled updates will be incorporated into those plans.

T+1 Systems and Processing Changes

This section lists DTCC’s systems and processing changes for T+1, which will take effect upon implementation of the T+1 settlement cycle on May 28, 2024. These changes are depicted over the T+1 conversion period, defined as start of business on Friday May 24, 2024, (last business day of the T+2 settlement cycle) through Wednesday May 29, 2024, (Double Settlement Date for Regular Way trades received on May 24, 2024, and May 28, 2024).

NSCC TRADE CAPTURE

NSCC will implement coding changes to its Universal Trade Capture (UTC) system and Exchange Traded Funds (ETF) Creation and Redemption system to update the rules these systems use to assign the settlement date to transactions in a T+1 settlement cycle.

- **Universal Trade Capture (UTC) system:** UTC receives Trade Date and Settlement Type (Cash, Seller’s Option, Regular Way and When Issued) from submitters (generally exchanges and Alternative Trading Systems). If Seller’s Option is submitted, the transaction must also include a number of days to settlement. UTC assigns settlement date based on the values submitted on the trade.

Universal Trade Capture System (UTC)

- **Exchange Traded Fund (ETF) Creation and Redemption System:** The ETF system receives Trade Date and Shortened Settlement Indicator Value (Space = Regular Way, 1 = One Day Settlement (Regular Way), 2 = Two Day Settlement or) for the Creation / Redemption instructions from the ETF Agents. The ETF system assigns settlement date based on the submitted Shortened Settlement Indicator Value.
- The ETF system also receives Trade Date and Shortened Settlement Indicator Values 2 and 3, which represent extended settlement.

NSCC Trade Matching – Corporate Bonds, Municipal Bonds And Unit Investment Trusts (CMU)

The existing (T+2) CMU Real Time Trade Management (RTTM) trade matching cutoff of 11:30AM ET on Settlement Date (SD) will change with the implementation of the T+1 settlement cycle to 1:30PM ET, in order for a trade to be assigned its contractual Settlement Date (SD).

CMU will continue to allow Regular Way municipal bond transaction submissions before Issuance Date (ID). In T+1, the earliest RW trades can settle, if submitted before ID, would be ID+1. As such, on ID-1, CMU will accept either regular way trades or When Issued (WI) trades with Extended Settlement Date =1 for settlement date of ID+1.

WI trades must continue to be matched by ID-1 to be eligible for settlement otherwise they will be purged. Matched WI transactions will continue to be “peeled” on the night of ID-2.

WI trades matched on ID-1 will be peeled for settlement during the night of ID-1 and attempted for settlement during the DTC night cycle.

CMU RTTM

CMU RTTM Trade Matching Cut off	<p>CMU T+2 trades submitted on Friday May 24, 2024, must be matched by 1:30PM ET on T+2 (Wednesday May 29, 2024, in this case) in order to be assigned its contractual T+2 settlement date.</p> <p>If a trade is matched past the 1:30PM ET on settlement date cutoff, CMU RTTM will assign the settlement date of the next business day</p>	<p>CMU T+1 trades submitted on Tuesday May 28, 2024, must be matched by 1:30PM ET on T+1 (Wednesday May 29, 2024 in this case) in order to be assigned its contractual T+1 settlement date.</p> <p>Trades matched past 1:30PM ET, will be assigned the settlement date of the next business date</p>	<p>CMU T+1 trades submitted on Wednesday May 29, 2024, must be matched by 1:30PM ET on T+1 (Thursday May 30, 2024, in this case) in order to be assigned its contractual T+1 settlement date.</p> <p>Trades matched past 1:30PM ET, will be assigned the settlement date of the next business date.</p>	<p>CMU T+1 trades submitted on Thursday May 30, 2024, must be matched by 1:30PM ET on T+1 (Friday May 31, 2024, in this case) in order to be assigned its contractual T+1 settlement date.</p> <p>Trades matched past 1:30PM ET, will be assigned the settlement date of the next business date.</p>
	<i>* Friday May 24, 2024, is the last business day under T+2</i>	<i>** Tuesday May 28, 2024, is the first business day under T+1</i>		

Trade Affirmation – DTCC ITP (Institutional Trade Processing)

The following changes will apply to DTCC ITP (Institutional Trade Processing), upon implementation of the T+1 settlement cycle (effective start of business on May 28, 2024):

- The affirmation cutoff time for having institutional trades automatically introduced into NSCC and DTC for straight-through-processing.
- The bilateral trade reverse affirmation cutoff time
- The Prime Broker disaffirmation cutoff time

THESE CHANGES ARE OUTLINED IN THE TABLE BELOW:

	* Friday May 24, 2024, is the last business day under T+2	** Tuesday May 28, 2024, is the first business day under T+1		

ADDITIONAL NOTE:

DTCC will publish a guide specifically on Corporate Actions processing prior to the T+1 conversion period to [UST1.ORG](https://www.ust1.org) website. This document will provide additional information on the complexities related to Distribution events with Ex-Date of May 28, 2024, and Voluntary Reorganization events with Guarantee of Delivery features expiring on and after for Friday, May 24, 2024.

Wealth Management Services – Mutual Fund Services- NSCC

Effective May 28, 2024, NSCC Wealth Management Services will systematically update the settlement cycle for domestic securities in the Fund/SERV system®, which currently have a T+2 settlement cycle, to a T+1 settlement cycle. Additionally, in order to maximize the window for confirmation and correction processing in a T+1 environment, NSCC will systematically update ALL U.S. denominated T+1 securities (including offshore Security Types 59 and 62) with a USN Currency Code to a USD Currency Code. Currency code changes will not be applied to Security Type 63 since they are not denominated in U.S. dollars.

Important notice [a9321](#) and [FAQs](#) provide additional information on the mutual fund settlement cycle updates to T+1. The following table outlines the impact to Fund/SERV trades submitted prior to, and on or after the May 28, 2024, effective date for the securities being systematically updated from a T+2 to T+1 settlement cycle.

Fund/SERV

T+1 Impact on DTCC Outputs

NSCC'S CONSOLIDATED TRADE SUMMARY (CTS) OUTPUT

The move to a T+1 settlement cycle will **not** impact the format, reporting logic and distribution processing of existing ITP, DTC and NSCC outputs. All outputs will be produced in the same format and at the same time as in the current T+2 settlement cycle.

However, shortening the standard settlement cycle from T+2 to T+1 will shift the reporting of certain transactions on the CTS output. Additionally, on May 28, 2024.

THESE CHANGES ARE DEFINED IN GREATER DETAIL BELOW:

Consolidated Trade Summary (CTS)				
<i>Please note DTCC will be closed on Monday, May 27, 2024, in observance of Memorial Day</i>				
Trade Type	PRE- CONVERSION RULE (T+2)	POST-CONVERSION RULE (T+1)		
	Friday, May 24, 2024*	Tuesday, May 28, 2024**	Wednesday, May 29, 2024	Thursday, May 30, 2024
CTS Cycle 1 (distributed at approximately 9PM ET)	<p>Regular Way trades (TD = 05/24) are reported in the CTS Cycle 1 output on T (as trades settling in two business days) – SD (05/29)</p> <p>Next Day Trades (TD = 05/24) and As of RW Trades (TD =05/24 or before) will be reported with a settlement date = 05/28</p>	<p>RW trades (with the exception of OCC stock option trades), will be reported in the CTS Cycle 1 output on T (trades settling in one business day)</p> <p>Reports all RW OCC trades received with a TD=05/24, SD=05/29</p> <p>RW OCC Stock Option Trades (TD =05/28, SD=05/29) will be reported in the CTS Cycle 2 output</p>	<p>Same as May 28, 2024</p> <p>RW OCC Stock Option Trades (TD =05/29, SD=05/30) will be reported in the CTS Cycle 2 output</p>	<p>Same as May 28, 2024</p> <p>RW OCC Stock Option Trades (TD=05/30, SD=05/31) will be reported in the CTS Cycle 2 output</p>
	<i>* Friday May 24, 2024, is the last business day under T+2</i>	<i>** Tuesday May 28, 2024, is the first business day under T+1</i>

Trade Type	PRE- CONVERSION RULE (T+2)	POST-CONVERSION RULE (T+1)		
	Friday, May 24, 2024*	Tuesday, May 28, 2024**	Wednesday, May 29, 2024	Thursday, May 30, 2024
CTS Cycle 2 distributed at approximately 11:59PM ET today, will be distributed at approximately 11:30PM ET on May 28, 2024	Reports trades received between CTS Cycle 1 and CTS Cycle 2, settling in two business days and one business day	Reports trades received between CTS Cycle 1 and CTS Cycle 2, settling in one business day Reports all RW OCC trades received with a TD=05/28, SD=05/29	Same as May 28, 2024 Reports all RW OCC trades received with a TD=05/29, SD=05/30	Same as May 28, 2024 Also reports all RW OCC trades received with a TD=05/30, SD=05/31
CTS Cycle 3 distributed at approximately 11:45AM ET today, will be distributed at approximately 1:45PM ET on May 28, 2024	Reports trades settling in one business day or on the same business day	Reports trades settling on the same business day	Same as May 28, 2024	Same as May 29, 2024
	<i>* Friday May 24, 2024, is the last business day under T+2</i>	<i>** Tuesday May 28, 2024, is the first business day under T+1</i>		

UTC REAL-TIME BALANCE ORDER MESSAGE

Effective Tuesday, May 28, 2024, UTC will begin distributing a new Real-Time Balance Order message between approximately 4:00AM. ET and 1:30PM. ET (CTS Cycle 3 cutoff) for all non-CNS transactions received on settlement date.

This message will enable firms to settle those balance orders earlier at DTC as opposed to waiting for CTS Cycle 3 to be distributed. The message will include the balance order control number reported on CTS Cycle 3. In addition to generating a new Real-time Balance Order Message on settlement date for non-CNS trade-for-trade balance order transactions, UTC will also send those balance orders to the Obligation Warehouse (OBW) in near real time. OBW, upon receipt, will then distribute advisory messages of the newly created obligations for same-day settling balance orders in near real time to Members between from 4:00 AM ET and 1:30 PM ET. Additionally, if the deliverer set-up for the Auto DO process on the NSCC Masterfile, OBW will forward those deliveries over to DTC settlement on their behalf at 8:00 AM ET, 11:00 AM ET and 1:40 PM ET.

CNS Input/Output

CNS MIDDAY PROJECTION FILE

- NSCC will distribute the CNS Midday Projection File beginning May 28, 2024, at 5PM ET.
- The Midday Projection File will include an updated projection of CNS settling positions for the next business day. This output will primarily include the net of the following: 1- Closing CNS Positions from SD 05/28/24, 2- All post conversion RW trades received by UTC before 4:30 PM ET with a TD = 05/28/24, SD= 05/29/24 and 3- All pre-conversion RW or SO trades with a TD = 05/24/24 or before, SD = 05/29/24
- This output will be distributed at approximately 5PM ET, after the CTS Cycle 3 distribution at 1:45PM ET.
- The CNS Midday Projection File will be distributed as both Machine Readable Output (MRO) and Comma Separated Value (.CSV) file. The latter can be downloaded to Excel to create a report version. The production AutoRoute #s are 02042358 (MRO) and 02042366 (CSV)

CNS EXEMPTION AND PRIORITY INPUT

- Starting on 05/28/24, the cutoff time to submit CNS exemption & priority instructions will change to 10:45 PM EST. Absent submission of an override instruction, the Member's regular standing exemption & priority instruction on the NSCC Masterfile will be used. Specifically for exemptions, the override instruction just applies to CNS short positions settling in the night cycle that are reported on the CNS Position Prior to Night Cycle File/Report distributed at 9:45PM ET. The CNS Projection File can no longer be used for this process because it will be distributed at 2:00AM ET on settlement date, after the night cycle completes. For new or increased short positions created in the day cycle resulting from late "as of" RW trades that missed the night cycle or cash trades received on settlement date, a Member's One Day Settling exemption instruction (which will now be renamed to Same Day Settling exemption instruction) on the NSCC Masterfile will be used. This exemption instruction cannot be overridden and is either a Level 0 or a Level 1.
- As a result of the changes to the exemption process, one-day settling CNS ACATS positions from a transfer that has aged to "Settle-Close" can now have a CNS exemption override instruction processed against that position for settlement in the night cycle. Members should review their exemption process of CNS ACATS settling positions as both two-day settling ACATS and one day settling ACATS with the same settlement date are eligible for exemption override instructions. For CNS ACATS exemption processing, it is suggested that Members use the CNS Midday Projection File issued at 5:00PM ET or the CNS Position Prior to Night Cycle File issued at 9:45PM ET.

OTHER CNS OUTPUT

- Please see the Accelerated Settlement (T+1) DTC, NSCC & ITP Functional documents for the new CNS file/report output times beginning on May 28, 2024

DTCC's Implementation Support Structure

DTCC's support of the T+1 implementation process will be incorporated within the T+1 Industry Command Center's support plan, which will be published to the [UST1.org](https://www.ust1.org) website.

Key elements of the Command Center's T+1 implementation support plan are as follows:

- **Contact List:** The Command Center will publish a contact list for quick access to Key Industry and Market Infrastructure staff, including DTCC contacts.
- **Industry Calls:** Industry calls will be scheduled from Friday, May 24, 2024, through Friday, May 31, 2024, to provide Industry Members with a common forum to raise and discuss issues and feedback, including any that pertains to DTCC. DTCC may also establish separate calls for its Members, if needed.
- **T1 Implementation Mailbox:** DTCC will continue to use the UST1@dtcc.com T+1 testing mailbox so that Industry Members can submit any T+1 implementation questions or issues. This mailbox will be monitored by a T+1 support team throughout the transition process and ending at the end of the business day on May 31, 2024. The support team will route the questions to appropriate industry infrastructure or organization and will coordinate timely resolution of inquiry.
- **Status Updates:** The Command Center will publish status and issue tracking information to the UST1.ORG website beginning Friday, May 24, 2024, through Friday May 31, 2024, on an as needed basis.
