Title: 05.24- Deliver Orders (DOI1/DOI5) Function User's Guide

Document History

07/01/07	Initial version
04/01/08	Change CCF-II to FTP and NDM and added Processing Table Appendix
10/01/08	Add updates for Security Holder Tracking Service
09/01/09	<p>Updated Section 3.1 DOI1/DOI5 INPUT File Format with the following:</p> <p>Change field definitions of Security Quantity in position 117-131 and Money Amount in position 132-148.</p> <p>Change field name from Due Bill indicator to Fail Tracking indicator in position 449.</p> <p>Added Obligation Warehouse control number in position 712-727.</p> <p>Added in section 4 DOI1/DOI5 Error Codes new error codes.</p> <p>Updated Appendices 5.1 Valid Reason Codes.</p> <p>Change reason codes description of 620 - 628 from Balance Order to Obligation Warehouse DO.</p> <p>Added reason codes 704 - 707 for OCC Stock Loan and Stock Loan Return.</p> <p>Added reason code 708 for ECCP Net Obligation.</p>
02/01/10	Updated Section 4 DOI1/DOI5 Error Codes to add new error codes for CSD DOs.
01/01/11	<p>Updated section 3.1 position 712-727 (Obligation Warehouse Control Number).</p> <p>Removed the following phase: "Mandatory for OW DO transaction, reason code 620 thru 628."</p> <p>Updated Section 4 – Error Codes to remove OW "required" error codes.</p>
09/01/15	<p>Updated section 5.1 for MMI Finality Through Optimization Initiative. Added reason codes:</p> <ul style="list-style-type: none">• 134 MMI SECONDARY DO – BYPASS FUNDING DECISION• 135 MMI SECONDARY DO – RECLAIM BYPASS FUNDING DECISION
08/08/2017	Updated Sections 3.1 and 4 for Matching Utility Messaging. Added ID Control Number and Partner Reference Number

09/28/2017	Added Partner Reference Number position 728 and ID Control Number position 659. Positions 753-1024 are filler. Added field error code: CAHN related to the partner Reference Number. Modified the error Code for Customer Reference Number.
11/30/2018	Removed formatting and references to old changes.

1. Objectives of This Chapter

The objectives of this chapter are:

- Give an overview of DOI1/DOI5 INPUT functions
- Illustrate the formats of required records

2. DOI1/DOI5 OVERVIEW

Functions DOI1 is used for MQ transmissions; DOI5 is used for FTP AND NDM. The functionality does not change between input media.

2.1 The DOI1/DOI5 Function

A Day Deliver Order (DOI1/DOI5) is a transaction received by the Depository Trust Company requesting the transfer (either immediate or future) of a specified quantity of a security, having a stated value, from one DTC participant to another. The "delivering" participant initiates the request, while an eligible, "receiving" participant receives the security.

A User may use the DOI1/DOI5 function to transmit Deliver Order transaction to DTC 24x6 and based on the Cutoff Time Schedule for DOI1/DOI5 Transmissions.

2.2 DOI1/DOI5 Transmissions

When using the DOI1/DOI5 functions, the User transmits deliver order transactions to DTC and receives responses indicating any errors that have been detected in the transmitted transactions.

If the transactions transmitted to DTC via DOI1/DOI5 are considered critical, the User should prepare procedures to be invoked in the event the transmission media is unavailable.

2.3 Cutoff Time Schedule for DOI1/DOI5 Transmissions

DOI1

DO transactions will be accepted:

- From 3:00 p.m. Sunday to 3:00 p.m. Saturday, and are subject to normal RAD (Receiver Authorized Deliveries) Rules as described in the Settlement Services User Guide.

DOI5

DO transactions will be accepted:

- From 3:00 p.m. Sunday to 3:00 p.m. Saturday with the exception of a 30 minutes downtime between 1:15 a.m. and 1:45 a.m. Monday thru Friday for FTP and NDM.

NOTE: Valued transactions are those with a dollar amount greater than zero. Free transactions are those with a dollar amount equal to zero. RAD (Receiver Authorized Deliveries) may be approved or canceled through PTS, PBS or MQ until the following times:

- 3:30 p.m. for Valued Transactions
- 5:00 p.m. for Valued Settling Bank Transactions
- 6:30 p.m. for Free Transactions

NOTE: The times listed above describe the cutoff times for input. The position update at DTC will usually be between 5-15 minutes later than the input time.

Any DOI1/DOI5 transmission initiated prior to cutoff will be allowed to continue to completion.

2.4 DO Processing Rules based on Process on this Settlement Date Only Indicator

- The “Process on this Settlement Date Only” indicator serves two purposes:
 1. It is used to determine if a transaction should be rejected or accepted based on the input time and the settlement date on the transaction.
 2. It is used to determine if a participant’s drop profile should be applied, i.e., if the indicator is on (Y), the transaction is not reintroduced regardless of the participant’s drop profile; if the indicator is off (N), the transaction is reintroduced regardless of the participant’s drop profile; if the indicator is not supplied (Blank), the transaction is either reintroduced or not based on the participants drop profile.
- When transactions are submitted *after* input cutoff and *before* the start of the next processing day:
 1. If the “Process on this Settlement Date Only” indicator is “Y” and the settlement date on the transaction is the current day or a past date, the transaction is rejected.
 2. If the “Process on this Settlement Date Only” indicator is “Y” and the settlement date on the transaction is a future settlement date, the transaction is accepted.
 3. If the “Process on this Settlement Date Only” indicator is “N” and the settlement date on the transaction is the current day or a past date, the transaction is accepted.
 4. If the “Process on this Settlement Date Only” indicator is “N” and the settlement date on the transaction is a future settlement date, the transaction is accepted.
 5. If the “Process on this Settlement Date Only” indicator is blank and the settlement date on the transaction is the current day or a past date, the transaction is accepted.
 6. If the “Process on this Settlement Date Only” indicator is blank and the settlement date on the transaction is a future settlement date, the transaction is accepted.
- All transactions that are submitted *after* the start of the processing day (approximately 7:30 pm, and *before* input cutoff) are accepted regardless of the “Process on this Settlement Date Only” indicator and settlement date on the transaction.

2.5 Modes of Transmission

The Deliver Order function is available via MQ and FTP AND NDM, where processing has been enhanced to provide interactive receipt and distribution of data.

3. Deliver Orders

Each application data record consists of:

- A transaction header that contains six communication-oriented fields, for a total of 26 characters
- The deliver order input (detail) file

If an input file does not meet edit criteria, DTC returns it to the submitter in an output record, preceded by a mailbox prefix and followed by an error block to identify the field(s) in error.

Potential errors are listed in Section 4 of this document. A full description of this processing is contained in the Chapter 2.03, Interface Control Manager (Transaction Input).

All fields indicated as DTC Validation = Yes are validated.

3.1 DOI1/DOI5 Input File Format

Position	Length	Format	Field Name	Validate	Field Description
Positions 1 through 26: Transaction Header					
1-1	1	Character X(1)	Feedback Indicator	N	* = If no errors ? = If record contains errors This field is used by DTC to indicate the return of this record because of errors. A full description of this processing is available in a separate document <i>Interface Control Management</i> .
2-2	1	Character X(1)	Production Test Indicator	Y	Required Indicator: P = Production T = Test
3-8	6	Character X(6)	Record Type	Y	Type of data contained in message: Valid value: DO24X6 = used for DO for 24x6 service
9-10	2	Numeric 9(2)	Record Suffix	Y	Record number identifier: 01 = First Record

Position	Length	Format	Field Name	Validate	Field Description
11-12	2	Numeric 9(2)	Version Number	Y	Version number of the input that defines the record format: 01 = The first version of the record layout. Note: If a new version of the record layout is subsequently introduced, 02 will be used.
13-18	6	Character X(6)	Record Sequence Number	N	Submitter assigned transaction identifier (optional); returned only during interactive error reporting.
19-26	8	Character X(8)	Addressee		Reserved for DTC use.
27-30	4	Character X(4)	Filler	-	Reserved for DTC use.
31-34	4	Character X(4)	BTID	Y	Business Transaction Identifier : DO01 = Valued Deliver Order DO02 = Free Deliver Order DO03 = ADR Valued Deliver Order DO04 = ADR Free Deliver Order DO05 = IPO Valued Deliver Order DO06 = IPO Free Deliver Order DO07 = Depository Deliver Order DO08 = Federal Deliver Order DO09 = Security Holder Tracked Valued Deliver Order DO10 = Security Holder Tracked Free Deliver Order
35-50	16	Character X(16)	Filler	-	Reserved for DTC use.
51-66	16	Character X(16)	Customer Reference No.	Y	Customer Reference Number.
67-71	5	Character X(5)	Deliverer Sequence No.	N	Deliverer Sequence Number. Allows transmitting party to identify record.

Position	Length	Format	Field Name	Validate	Field Description
72-87	16	Character X(16)	IMS TID	N	IMS Transaction Identifier used to identify the transaction to be reclaimed. Note: For non-reclaim transaction must be spaces.
88-88	1	Character X(1)	Process on Settlement Date only Indicator	Y	Process on Settlement Date Only Indicator Valid values are: Y = Yes N = No Blank Note: Please see DO Processing Rules for Process on Settlement Date Only Indicator.
89-96	8	Numeric 9(8)	Deliverer	Y	Delivering Participant number (right-justified with leading zeroes).
97-98	2	Character X(2)	ISIN Country	Y	Country Code.
99-107	9	Character X(9)	CUSIP	Y	CUSIP of the security to be delivered.
108-108	1	Character X(1)	ISIN Check	Y	ISIN Check Digit.
109-116	8	Numeric 9(8)	Receiver	Y	Receiving Participant number (right-justified with leading zeroes).
117-131	15	Numeric 9(15)	Security Quantity	Y	The total number of securities. Note: The first 6 digits (leftmost) are provided for future field expansion. Currently, DTC will accept only 9 digits quantity and the first 6 digits (leftmost) must be zeroes. The maximum acceptable Principal Quantity for VALUED MMI DOs is 50,000,000.

Position	Length	Format	Field Name	Validate	Field Description
132-148	17	Numeric 9(14)V99 9	Money Amount	Y	<p>Amount of money for this transaction (right-justified with leading zeroes). Fourteen digits represent whole amount and the last three digits present fractional amount, preceded by an implied decimal point.</p> <p>Note: Currently, DTC will accept only 10 digits in the whole amount. The first 4 digits in the whole amount (leftmost) are provided for future field expansion and must be zeroes. The 3 decimal positions are provided for future acceptance of foreign currency transactions. For US\$ transactions, the least significant fractional (rightmost) digit must be zero.</p>
149-151	3	Character X(3)	Currency Code	Y	<p>The currency code for the transaction.</p> <p>USD = US Dollars (currently DTC accepts USD only).</p>
152-155	4	Numeric 9(4)	Reason Code	Y	<p>The reason code for the transaction (right-justified with leading zeroes).</p> <p>Use DORI function in PTS or DO Reason Code Inquiry in PBS for reason codes or see attached appendix.</p>
156-163	8	Numeric 9(8)	Settlement Date	Y	<p>The date the transaction settles. Format YYYYMMDD.</p>
164-197	34	Character X(34)	Deliverers Account #	N	<p>Deliverer's internal account number.</p>
198-231	34	Character X(34)	Receivers Account #	N	<p>Receiver's internal account number.</p>
232-265	34	Character X(34)	Subordinate Bank Account #	N	<p>Internal account number for a subordinate bank.</p>

Position	Length	Format	Field Name	Validate	Field Description
266-299	34	Character X(34)	Depository Third Party	Y	If delivering or receiving party is a depository, the Third Party to the transaction. This is left justified. Otherwise must be spaces.
300-313	14	Numeric 99V9(12)	CMO Factor	Y	Optional field - If a value is supplied it must be numeric. Spaces will be accepted to indicate CMO Factor is not applicable.
314-347	34	Character X(34)	IPO Deliverer Internal Acct #	Y	If CUSIP is IPO tracked must be alphanumeric and left justified. Otherwise, must be spaces.
348-381	34	Character X(34)	IPO Receiver Internal Acct #	Y	If CUSIP is IPO tracked must be alphanumeric and left justified. Otherwise, must be spaces.
382-389	8	Numeric 9(8)	IPO Trade Date	Y	If CUSIP is IPO tracked must be numeric and in the format YYYYMMDD.
390-423	34	Character X(34)	IPO Broker Internal Account #	Y	If CUSIP is IPO tracked must be alphanumeric and left justified. Otherwise, must be spaces.
424-431	8	Character X(8)	IPO Correspond. Account #	Y	If CUSIP is IPO tracked must be numeric, right justified and left zero filled. Otherwise, must be spaces
432-432	1	Character X(1)	IPO Buy Sell Indicator	Y	Indicates that the Prime Broker is buying or selling. B = Buy S = Sell Blank = Not an IPO transaction.
433-440	8	Character X(8)	ATP Transaction Number	Y	Number of the transaction to be reclaimed.
441-448	8	Numeric 9(8)	Original Transaction Date	N	The date the transaction being reclaimed was originally processed. Format YYYYMMDD.

Position	Length	Format	Field Name	Validate	Field Description
449-449	1	Character X(1)	Fail Tracking Indicator	Y	(formerly known as Due Bill Indicator) Indicates whether due bills are carried on this issue. Valid values are: Y = due bills are carried, N = due bills are not carried. Note: If this field is blank or contains an invalid value it will be set to Y.
450-450	1	Character X(1)	PTA Indicator	Y	Indicates if the delivery should affect the Protected Transaction Account. Valid values are: Y = should affect the account, N = should not affect the account. Note: If this field is blank or contains an invalid value it will be set to N.
451-451	1	Character X(1)	Prevent Pend Indicator	Y	Indicates if the delivery should be prevented from recycling Valid values are: Y = do not permit recycle, N = allow recycle.
452-462	11	Character X(11)	BIC	Y	Bank Identifier Code of the Institution receiving the ordinary shares and left justified. Note: Mandatory for ADR DO transaction, reason code 300.
463-478	16	Character X(16)	Account ID Number	Y	Account number information at the institution receiving the ordinary shares. Note: Mandatory for ADR DO transaction, reason code 300.

Position	Length	Format	Field Name	Validate	Field Description
479-479	1	Character X(1)	Certification Flag	Y	Certification Flag: Y = Allow brokers to warrant that they have the applicable certificate or papers, Blank = does not apply. Note: Applies to ADR DO transaction, reason code 300.
480-501	22	Character X(22)	Free Format Text	N	Optional 22 bytes available that could include account name which is not required. This may also include share amount required for Taiwanese certification. This is alpha numeric and left justified. Note: Applies to ADR DO transaction, reason code 300.
502-711	210	Character X(210)	Comments	N	Comments. Note: For ADR DO transaction with reason code 300, position 131-210 in the comments will be used for ADR fields.
712-727	16	Character X(16)	Obligation Warehouse Control Number	Y	Control number assigned by the Obligation Warehouse system. Format is 16 characters. The first character must be "W" and the remainder must be numeric. Otherwise must be spaces.
728-743	16	Char X(16)	Partner Reference Number	Y	Format is 16 characters. If value entered, the value must contain 16 alphanumeric values without spaces. Otherwise must be spaces.
744-752	9	Char X(9)	ID Control Number	Y	Format is 9 alphanumeric characters. Otherwise must be spaces. Invalid values will be ignored.
753-1024	272	Char X(272)	Filler	N	Filler

4. DOI1/DOI5 Error Codes

The machine-readable input error codes are a combination of the field in error (a 4-byte field code) and the error type (a 4-byte reason code). The resultant 8-byte error codes identify the specific fields and the types of errors that prevented an input message from being processed. Inputs containing one or more errors are returned to the submitter for correction. The following error code table is sorted alphabetically by field code (column one) and then by reason code (column two).

Deliver Order Error Codes		
Field Code	Error Code	Explanation
AADA	9AD1	OCC/HEDGE Transaction Overvalued Item not Allowed
