

IMPORTANT NOTICE

Fixed Income Clearing Corporation

#: CMU007.07
Date: August 17, 2007
To: All Remote Access Coordinators
Subject: RTTM Web Front End – Changes to Remote Access Coordinator Procedures

This notice is intended for Remote Access Coordinators in your organization responsible for user access to RTTM Web Front End (RTTM WFE).

Effective August 20, 2007, users will be allowed to access any of FICC products, based on their user class assignment, using a single user id and password.

Note: The new features are totally compatible with the existing data structures. All current user profiles remain intact and need not be changed.

Summary of New Features

To enable Remote Access Coordinators (RACs) greater flexibility in managing user access to various products in RTTM WFE, the following changes will also be implemented.

In the Add New User screen, the Product Access section has been updated to:

- Give the RAC more specific control over which Trading accounts and / or Report Center accounts the user can access, by allowing the RAC to define the different User Classes (for all three FICC products) and / or the Aggregate Classes (for MBS products only).
- Allow the RAC to manage access to multiple FICC products from within any of the RTTM WFE applications.
- Display only those User Classes and / or Aggregate Classes that are assigned to your firm.

In the User Query Results screen, the RAC can now:

- View your firms' RTTM WFE user security related information for all FICC products at a glance. For each user, it summarizes all the information that was entered in the Add New User screen.
- Download the "entire" Query Results database for your firm to an Excel Spreadsheet with "one click" of the Export button. Previously you could only download one page at a time.

Links to Documents

For a more detailed account of these changes, see Sections 3 and 4 in the appropriate Remote Access Coordinator User Guide. See below for the links by product.

If you are responsible for assigning access to the RTTM WFE for:	Click on one of the following links to access the appropriate User Guide:
