**From:** MarkitSERV Product Management  
**Subject:** MarkitSERV DSMatch Credit Novation Consent release, February 12, 2010

At the close of business (NY) Friday, February 12, 2010 there will be a MarkitSERV DSMatch Credit release during which various enhancements will be moved into production for Credit Novation Consent.

The key feature of this release involves converting the Novation Consent system from a Java applet based architecture to a standard HTML browser based architecture, which removes the need for Java to be installed on each User's PC.

Other features of the release include minor functional changes detailed in the "Novation Consent v2.0: Key Features document" located on ([http://www.dtcc.com/products/derivserv/members/novation\\_consent.php](http://www.dtcc.com/products/derivserv/members/novation_consent.php)) under "Product Training & Support". For further information, please also see the Novation Consent Installation Guide (Version 2).

Please be advised that the MarkitSERV Credit Novation Consent Web application and processing queues will be down from 7.30pm EST until approximately 9.30pm EST.

Any questions or comments regarding this Important Notice or MarkitSERV in general should be directed to your MarkitSERV client account representative CAG@MarkitSERV.com or:
