

Deriv/SERV

Growing the Market for Over-the-Counter Derivatives through Streamlined Processing

Subject: Trade Information Warehouse (TIW) Service Overview

(Offered On Request)

This session provides a comprehensive overview of the Trade Information Warehouse (TIW), the central industry database and technology infrastructure implemented in November 2006 for the global, over-the-counter (OTC) derivatives market. Discussion topics include the overall scope of the service and core components, primary functions and key service features, and the current status of the service (completed as well as future product releases).

TIW Courses are available via DTCC eLearning
