

# Want to Partner with Insurance Services at DTCC?

Find Out How....

Insurance Services partners with service bureaus, vendors and other solution providers of integration services that bring the benefits of automation and standardization to the insurance industry. Through our partnerships, we connect carriers and distributors to a proven processing technology and enormous infrastructure, helping the industry reduce risks, gain efficiencies and grow business.

To become a DTCC partner, solution providers can take the following steps:

- Conduct a pre-screening conference call to determine the services of interest to you
- Complete a non-disclosure agreement
- Determine sponsor participant(s)
- Obtain participant authorization for file transmissions (Participant must go through membership process, if not already a member)

Once in production, you will be added to our Solution Provider Directory and further marketing opportunities can be discussed.

**Click here** to see our current list of partners.
