

## **DTCC's FIXED INCOME AND DTCC LEARNING LAUNCHES GSD PODCASTS**

July 2007, - DTCC's Fixed Income Division and DTCC Learning have launched a new series of podcasts for the Government Securities Division (GSD). The series covers those topics relevant to teaching the employees of DTCC's Fixed Income customers how to use Fixed Income GSD products. The podcasts, which can be accessed from <http://www.dtcc.com/products/training/podcasts.php>, are an easy way for customers to stay informed of product enhancements and other initiatives that affect use of the products and services of FICC.

"A podcast is a digital audio program, a multimedia computer file that can be downloaded to a computer, an iPod, or another device, then played or replayed on demand. Updated content and new editions can be downloaded quickly and, in some cases, automatically" states Kaliym Islam, the Vice President of DTCC Learning. "The traditional methods of teaching and presenting information to employees do not address all the needs of today's workforce, who are constantly multi-tasking. Podcasting is the perfect way to address this generation of learners. It allows them to 'learn on the go', so to speak."

### **About DTCC**

The Depository Trust & Clearing Corporation (DTCC) is the largest financial services post-trade infrastructure organization in the world, with operating facilities in multiple locations in the U.S. and overseas. DTCC is the holding company for six subsidiary businesses – a depository and five clearing corporations – as well as a global joint venture with Thomson Financial (called Omgeo). Through its subsidiaries, DTCC provides clearance, settlement and information services for virtually all equity, corporate debt, municipal debt, government securities, mortgage-backed securities, and emerging market sovereign debt trades in the U.S., totaling more than \$1.7 trillion daily. It is also a leading clearinghouse for mutual funds and insurance products, linking funds and carriers with distribution networks. In addition, DTCC provides custody and asset servicing for more than two million securities from the U.S. and 84 other countries, worth about \$23 trillion.
