AN OVERVIEW
SECURING TODAY. SHAPING TOMORROW.

DTCC
DTCC, through its subsidiaries, provides industry-leading solutions to safeguard the world’s financial markets. For more than 45 years, we have served as the premier post-trade market infrastructure for the industry, advancing the automation, centralization, standardization and streamlining of processes critical to the markets’ safety and soundness.

Today, we stand at the center of securities trading activity, processing approximately 90 million financial transactions every day. We serve as the centralized clearinghouse for more than 50 exchanges and equity platforms, maintaining multiple data and operating centers worldwide providing strong business continuity and around-the-clock client support.

User owned and governed, DTCC serves the needs of clients from initial onboarding through trading, clearance, settlement, asset servicing and data reporting.

We provide services across multiple asset classes, including:
- Clearing
- Institutional matching
- Settlement
- Asset servicing
- Collateral management
- Global data management
- Information services

We provide these services for a wide range of securities products, such as:
- Equities
- Corporate and municipal bonds
- Government & Mortgage-backed securities
- Derivatives
- Mutual funds
- Money market instruments
- Alternative investment products
- Insurance

Our goal is to drive positive change. We leverage our unique market position to anticipate the market’s future needs and respond with solutions that lower costs, improve efficiency and bring stability and certainty to the industry we serve.
In keeping with our goal of providing certainty and reliability to the global financial system, DTCC provides services across the post-trade lifecycle that mitigate risk, reduce costs, increase transparency and promote greater market efficiency. These offerings are organized into six distinct categories:
