

to Optimize your FIX Post-Trade Workflow with DTCC's ITP Solutions

Do you want to leverage your FIX engine for optimal post-trade processing? We've identified the top four reasons to consider DTCC's Institutional Trade Processing (ITP) solutions.

#1: ENABLING A NO-TOUCH PROCESS

By using the ITP FIX interface, clients who prefer FIX connectivity can maintain that protocol and still enjoy the benefits of ITP's seamless front-to-back integration that provides true no-touch processing, and the eventual elimination of all trade and settlement exceptions and fails (except those that are cash or inventory related).

#2: ENABLING A GLOBAL COMMUNITY

DTCC ITP solutions currently enable access to +6,000 clients across 52 markets around the world. As a global solution for all segments and markets, CTM supports extensive connectivity options, including FIX, enabling our clients to interface with counterparties across the landscape, whether those counterparts are using a UI, XML, file based or FIX connection.

#3: VALUE FOR MONEY

With new harmonized pricing, ITP clients are able to leverage FIX messaging to connect to CTM providing the benefits of community connectivity, premier FIX interface support and best practice management all within their preferred connectivity option.

#4: WORLD-CLASS SUPPORT PROVIDED BY DTCC

CTM's FIX interface enables clients to maintain FIX connectivity and benefit from the extensive support and oversight provided by DTCC. DTCC provides 24/6 multi-lingual Technical Support, a global Relationship Management team, support for a firms' legal and regulatory compliance and comprehensive cyber-resiliency and business continuity programs.

It's time to re-imagine post-trade processing.
