BD of Record Change – Confirmation Format

- Header Record
- Contra Record
- Detail Record
  - **NSCC Control Number** – a new unique number for one transaction, created by the submitting carrier, to represent their confirmation transaction status
  - **Distributor Transaction ID** – original request transaction reference number. This ID is generated by DTCC and transmitted on the request XML message (e.g.:TransRefGUID) and will be returned on the carrier confirmation.
  - **Contract Number** – contract number associated with the BD of record change request.
  - **Carrier Request Status** - success or reject.
    - **Reason Code(s) for Rejection** – valid code from accepted list of reason codes.
