## FIXED INCOME CLEARING CORPORATION

AND

## NATIONAL SECURITIES CLEARING CORPORATION

QUANTITATIVE DISCLOSURES FOR CENTRAL COUNTERPARTIES

## **TABLE OF CONTENTS**

PRINCIPLE #	DISCLOSURE #	DISCLOSURE TITLE
4	4.1	Total value of default resources (excluding initial and retained variation margin), split by clearing service if default funds are segregated by clearing service)
	4.2	Ксср
	4.3	Value of pre-funded default resources (excluding initial and retained variation margin) held for each clearing service, in total and split by
	4.4	Credit Risk Disclosures
5	5.1	Assets eligible as initial margin, and the respective haircuts applied
	5.2	Assets Eligible for pre-funded participant contributions to the default resources, and the respective haircuts applied (if different from 5.1)
	5.3	Results of testing of haircuts
6	6.1	For each clearing service, total initial margin required, split by house and client (or combined total if not segregated)
	6.2	For each clearing service, total initial margin held, split by house and client
	6.3	Initial Margin rates on individual contracts, where the CCP sets such rates
	6.4	Type of initial margin model used (e.g. portfolio simulation or risk aggregation) for each clearing service and the key model design parameters for each initial margin model applied to that clearing service
	6.5	Results of back-testing of initial margin. At a minimum, this should include, for each clearing service and each initial margin model applied to that clearing service
	6.6	Average Total Variation Margin Paid to the CCP by participants each business
	6.7	Maximum total variation margin paid to the CCP on any given business day over the period
	6.8	Maximum aggregate initial margin call on any given business day over the period
7	7.1	Liquidity Risk
	7.2	Size and composition of any supplementary liquidity risk resources for each clearing service above those qualifying liquid resources above.
	7.3	Liquidity Risk

PRINCIPLE #	DISCLOSURE #	DISCLOSURE TITLE
12	12.1	Percentage of settlements by value effected using a DvP, DvD or PvP settlement mechanism
	12.2	Percentage of settlements by volume effected using a DvP, DvD or PvP settlement mechanism
13	13.1	Quantitative information related to defaults
14	14.1	Total Client Positions held as a share of notional values cleared or of the settlement value of securities transactions
15	15.1	General business risk
	15.2	General business risk; Financial Disclosures
	15.3	General business risk; Income breakdown
16	16.1	Total cash (but not securities) received from participants, regardless of the form in which it is held, deposited or invested, split by whether it was received as initial margin or default fund contribution
	16.2	How total cash received from participants (16.1) is held/deposited/invested, including;
	16.3	Rehypothecation of participant assets (ie non-cash)
17	17.1	Operational availability target for the core system(s) involved in clearing (whether or not outsourced) over specified period for the system (e.g. 99.99% over a twelve-month period)
	17.2	Actual availability of the core system(s) over the previous twelve month period
	17.3	Total number of failures
	17.4	Recovery time objective(s)
18	18.1	Number of clearing members, by clearing service
	18.2	Open Position Concentration
	18.3	Initial Margin Concentration
	18.4	Segregated Default Fund Concentration
19	19.1	Tiered participation arrangements, measures of concentration of client clearing
20	20.1	FMI Links, Value of Trades

PRINCIPLE #	DISCLOSURE #	DISCLOSURE TITLE
	20.2	FMI Links, Initial Margin or equivalent financial resources provided
	20.3	FMI Links, Initial Margin or equivalent financial resources collected
	20.4	FMI Links, Results of Back-testing coverage
	20.5	FMI Links, Additional pre-funded financial resources provided to
	20.6	FMI Links, Additional pre-funded financial resources collected from
	20.7	FMI Links, Cross Margining
23	23.1	Disclosure of rules, key procedures, and market data; Average Daily Volumes
	23.2	Disclosure of rules, key procedures, and market data; Non-Yet-Settled
	23.3	Disclosure of rules, key procedures, and market data; Execution Facility
PRC	PRC 1	Payment Risk Committee Disclosure - Concentration Measures
	PRC 2	Payment Risk Committee Disclosure - Initial Margin Detail

## **EXECUTIVE SUMMARY**

In February 2015, CPMI-IOSCO issued its final report on Quantitative Disclosure Standards for Central Counterparties ("CCPs"), which provides specific quantitative disclosure requirements for CCPs relative to a number of the PFMI principles. These disclosures are intended to complement the narrative disclosures included in the CPMI-IOSCO Disclosure Framework\*. This document contains the quantitative disclosures for the two divisions of the Fixed Income Clearing Corporation ("FICC") — the Government Securities Division ("GSD") and Mortgage-Backed Securities Division ("MBSD") — and the National Securities Clearing Corporation ("NSCC"). FICC and NSCC are wholly owned subsidiaries of The Depository Trust & Clearing Corporation ("DTCC").

The attached disclosures include, in addition to those required by CPMI-IOSCO, some supplemental disclosures as proposed by the Payments Risk Committee's Recommendations for Supporting Clearing Member Due Diligence of Central Counterparties (Feb 2013).

The information provided in this disclosure is reported as of the dates specified. For further information, please contact CPMI-IOSCO\_Quant@dtcc.com.

<sup>\*</sup> The Disclosure Frameworks for FICC and NSCC can be found at www.dtcc.com.

Disclosure						FICC		
Reference	Disclosure Description		Frequency	Data Type	GSD	MBSD	NSCC	Explanatory Notes
Disclosu	re 4.1 - Total value of default resources (excluding initial and retained va	ariation margin), split by clearing	ng service if defa	ult funds are segi	regated by clear	ing service		
4.1.1	Prefunded - Own Capital Before	Prefunded - Own Capital Before		USD \$MM	4	10.2	93.7	For NSCC, amount represents 25% of its Retained Earnings as at quarter end.
4.1.2	Prefunded - Own Capital Alongside			USD \$MM	n/a	n/a	n/a	FICC does not publish separate Retained Earnings balances for GSD and MBSD since each is a division operating within the legal entity FICC. The separate Rules of each of GSD and MBSD provide that each
4.1.3	Prefunded - Own Capital After			USD \$MM	n/a	n/a	n/a	of GSD and MBSD applies up to 25% (or more, if its Board determines) of FICC Retained Earnings in the event of a member default for which losses exceed the defaulting member's margin. Accordingly, the amount reported is equal to 25% of FICC Retained Earnings. If a member loss applies to both Divisions, FICC would allocate the amount reported to each Division in proportion to the respective Division-specific exposure.
4.1.4	Prefunded - Aggregate Participant Contributions - Required			USD \$MM	11,661	4,452	4,001	NSCC and each FICC Division calculates and collects Clearing Fund from its Members using a risk-based margin methodology. These amounts (a Member's "Required Fund Deposit") operate as the Member's
4.1.5	Prefunded - Aggregate Participant Contributions - Post-Haircut Posted			USD \$MM	15,607	5,052	4,741	margin, and the aggregate of all such Members' deposits is, collectively, the Clearing Fund, which operates as NSCC's/FICC (with respect to each division's) default fund.  For NSCC, on September 5, 2017, the US cash equities markets moved to a T+2 settlement cycle. Accordingly, after that date, the clearing fund has been calculated to take into account the shortened settlement cycle.  FICC and NSCC are seeking to develop a proposal to establish guarantee funds to cover tail risk. The proposal is in the development stage, and will be subject to Member outreach and the Rule Filing process. If such a structure is implemented, it (and not the Clearing Fund) would serve as the financial resource for mutualization.
4.1.6	Prefunded - Other			USD \$MM	n/a	n/a	n/a	
4.1.7	Committed - Own/parent funds that are committed to address a participant default (or r	ound of participant defaults)		USD \$MM	n/a	n/a	n/a	
4.1.8	Committed - Aggregate participant commitments to address an initial participant default defaults)	(or initial round of participant		USD \$MM	n/a	n/a	n/a	
4.1.9	Committed - Aggregate participant commitments to replenish the default fund to deal w (or round of participant defaults) after the initial participant default (or round of particip			USD \$MM	n/a	n/a	n/a	
4.1.10	Committed - Other			USD \$MM	n/a	n/a	n/a	
Disclosu	re 4.2 - Kccp - Quarter End

For NSCC, the amount represents a secured line of credit with a syndicate of lenders.
7.1.7	Size and composition of qualifying liquid resources for each clearing service; (f) unsecured comm the CCP may draw without providing collateral/security)	nitted lines of credit (ie which		USD \$MM	n/a	n/a	n/a	
7.1.8	Size and composition of qualifying liquid resources for each clearing service; (g) highly marketab and investments that are readily available and convertible into cash with prearranged and highly arrangements even in extreme but plausible market conditions			USD \$MM	10,276	2,712	168	Amounts include Clearing Fund securities.
7.1.9	Size and composition of qualifying liquid resources for each clearing service; (h) other			USD \$MM	51,270	613	0	For GSD and MBSD, the portfolio of a defaulting member, comprised of highly marketable collateral would also be available as a liquidity resource. Value and composition of that portfolio would vary by day and by member. September 29 was not an MBSD class-settlement day. For GSD/MBSD, amount represents the Repo Value of Underlying Securities.  NSCC's Supplemental Liquidity Deposit ("SLD") program provides for additional rules-based liquidity resources around monthly option expiry periods. Option expiry settlement cycles typically present elevated liquidity needs to NSCC. Members may be required to provide additional funding based on historical activity, or may voluntarily pre-fund outsize liquidity needs. Sizing of supplemental liquidity resources will vary based on the historical activity presented by NSCC's largest members as well as market dynamics during the current settlement cycle. (As of quarter end there were no SLD deposits on hand)  Resources reported in Section 7.1 are as of quarter end and do not correspond to the dates of the actual largest obligations. On the dates of the actual largest obligations sufficient liquidity resources were available.
7.1.10	State whether the CCP has routine access to central bank liquidity or facilities.				n/a	n/a	n/a	
7.1.11	Details regarding the schedule of payments or priority for allocating payments, if such exists, and procedure, and governance arrangement around such decision making.	d any applicable rule, policy,			n/a	n/a	n/a

Paymen	t Risk Committee Disclosure 2 - Intial Margin Detail		•								
i uyiiicii	t hisk committee bisciosare 2 milai Margin betain										
	Initial Margin Breakdown by Component	VaR / Volatility	Quarterly/ Quarter End	USD \$MM	6,417	4,423	2,805	The Value-at-Risk (VaR) and Volatililty components are based on the potential price fluctuations of unsettled positions.			
								With the implementation of SVaR for MBSD, Margin Proxy is now used as a backup VaR methodology in the event of a significant vendor data disruption.			
		Coverage Component (CC)		USD \$MM	711	n/a	16	The Coverage Component is a back-test-like component that is meant to address potential model deficiencies.			
								The Coverage Component is designed by NSCC to mitigate the risks associated with a Member's Required Deposit being insufficient to cover projected liquidation losses to the Coverage Target by adjusting a Member's Required Deposit towards the Coverage Target.			
		Implied Vol Charge		USD \$MM	1,604	n/a	n/a	The Implied Vol Charge (also known as the Augmented Volatility Multiplier, or AVM) is designed to enhance the performance of the model and enable GSD to more effectively achieve and maintain the confidence level targeted by GSD.			
		CME Cross Margin					USD \$MM	-39	n/a	n/a	GSD has a cross-margining arrangement with the Chicago Mercantile Exchange. The amount represents the aggregate margin savings for common members who elect to participate in the cross-margining arrangement.
		Margin Req. Differential (MRD)		USD \$MM	n/a	n/a	577	The MRD is designed to address position-variability risk by estimating the shortfall of end-of-day VaR and mark-to-market compared with the next day's intraday risk and the risk that the next margin call will not be satisfied.			
		Market to Market (MTM)		USD \$MM	n/a	0	161	As a cash market CCP, NSCC uses a continuous net system where securities within the settlement system are marked daily to the prior night's closing price.			
		Illiquid		USD \$MM	n/a	n/a	110	NSCC may apply an additional charge on positions in OTC Bulletin Board or Pink Sheet securities based on size, average daily volume or price; and financial condition of the participant. This charge is separate from both VaR and SPC.			
		SPC Charge		USD \$MM	n/a	n/a	n/a	NSCC dropped this charge as part of the Accelerated Trade Guaranty that was approved in Q2 and will drop the reporting of this charge in subsequent disclosures.			
		Special Charge		USD \$MM	2,890	17	42	Special charges include backtesting charges and GSD Margin Proxy, a newly created charge (a/o April 2017) is a minimum volatility calculation based on historical market volatility of U.S. Treasury and Agency securities indices and TBA's. GSD applies the greater of the amount calculated by the current VaR model and the Margin Proxy.			
		Other Charges		USD \$MM	79	12	291
