Subject:	Reduction in DTCC's Web-based Application Idle Time

As part of our continuing efforts to provide the most robust and secure processing environments possible, DTCC is reducing the Idle Session Timeout to 20 minutes for all Web-based applications. On **July 11, 2015**, the new timeout value will be implemented for all applications in both the PSE and Production environments.

Please note that this change will not disrupt any user actively interacting with a server application. It will only terminate sessions that are inactive for 20 consecutive minutes and will require the user to re-authenticate in order to resume working.

If you have any questions, please contact DTCC's Customer Support Center at 1.888.382.2721 (U.S. and Canada), 1.212.855.8099 (International).

DTCC offers enhanced access to all important notices via a Web-based subscription service. The notification system leverages RSS Newsfeeds, providing significant benefits including real-time updates and customizable delivery. To learn more and to set up your own DTCC RSS alerts, visit http://www.dtcc.com/subscription_form.php.
