DTCC

David Chayer

Managing Director, IT Cyber security, Developer Enablement and Platform Strategy and Delivery

David Chayer is Managing Director of IT Cyber Security, Developer Enablement and Platform Delivery and Strategy at DTCC. In this capacity, he leads the firm's public cloud strategy and global adoption and protection of platform capabilities and governance. Additionally, Dave oversees IT Cyber security Engineering and Operations, Identity and Access Management (IAM), platform delivery and the Developer Enablement organization. Prior to working at DTCC, he served as Executive Director of IT, Enterprise Infrastructure and Operations for Omgeo, which was acquired by DTCC in 2014.

David is skilled in leading global teams and delivering complex, business critical infrastructure. He has extensive experience managing IT in highly regulated industries, having consistently worked with several U.S. regulators on behalf of numerous organizations and the industry.

He has over 25 years of experience in enterprise infrastructure, platform and security engineering, and operations. He spends his time enjoying outdoor activities and volunteering with a number of local non-profit organizations.

David holds a bachelor's degree in business administration.
