DTCC Consulting Services
OUR EXPERTISE: YOUR ORGANIZATION.

LET THE POST-TRADE EXPERTS HELP YOU TRANSFORM YOUR REPORTING CONTROL FRAMEWORK
The Challenge

Combined with the abundance of rules already on the books – from Dodd-Frank to SFTR – the array of changing trade reporting regulations are straining firms’ operations to a heightened degree. Increased regulatory scrutiny, greater focus on accuracy and data quality, and readiness for upcoming rules changes are all clear and present pain points for firms today. And when a firm’s infrastructure and related control framework is already a patchwork of functionalities from a decade of adapting to the regulatory evolution, firms face mounting pressures.

Did you know?

Since 2017, the Financial Conduct Authority (FCA) has fined firms nearly £100 million for failure to comply with Markets in Financial Instruments Directive (MiFID) and European Markets Infrastructure Regulation (EMIR) rules. Since 2019, the Commodity Futures Trading Commission (CFTC) has fined firms nearly $20 million for similar breaches in CFTC reporting.* Many of these breaches were exacerbated by a lack of a clear control framework and governance around remediation items. Effective control frameworks may not only mitigate the threat of fines but can also help avoid some of the time-consuming and costly activities associated with examinations, attestation, remediation, and ongoing supervision by establishing a construct that focuses on early-identification and prevention.

*Data derived from the FCA and CFTC websites.

The Solution

With the help of our post-trade experts, we can help you address these challenges and help you get ready for the swathe of regulatory changes taking effect over the next few years.

DTCC Consulting Services experts leverage our proprietary Reporting Control Framework Model to conduct a deep dive diagnosis and propose an implementation plan to enable firms to enhance their reporting processes with the aim to help increase operational efficiencies, drive down costs, and mitigate risks.
The DTCC Consulting Services Reporting Control Framework Model helps clients evaluate gaps and implement improvements within their organizations.
