

**SYDNEY**  
22 - 25 Oct 2018

## DTCC SPEAKER LINE UP [sibos.com/conference/2018/programme](https://sibos.com/conference/2018/programme)

**William Hodash***Managing Director, Enterprise Data Management***LEI IN THE KALEIDOSCOPE OF PAYMENTS****Monday, October 22 | 1:00 - 1:45**

This panel of experts will examine the emerging pattern of the Legal Entity Identifier (LEI) in payments and what the registration of a LEI element in ISO 20022 payments message could enable.

**CYBERATTACKS IN THE SECURITIES MARKET? HOLD ON, I THOUGHT IT WAS JUST A PAYMENTS PROBLEM...****Tuesday, October 23 | 4:30 - 5:15**

This session highlights the major findings from the ISSA Cyber Working Group which identified the major cyber security risk for the securities market.

*Insights from Bill:* [The Increasing Importance of Enterprise Data Management](#)**Tim Lind***Managing Director, Data Services***POST TRADE BEING THE NEW PRE TRADE ... A DATA PERSPECTIVE****Tuesday, October 23 | 9:45 – 10:45**

How are data requirements changing across the ecosystem? This session will cover what firms can do to manage the challenges around extracting the right data at the right time.

**THE GOLDEN AGE OF INFORMATION: HOW CAN NEW TECHNOLOGY BREAK BIG DATA CHALLENGES?****Wednesday, October 24 | 3:30 - 4:30**

With the industry witnessing an unprecedented pace of change in technology, this conversation will explore whether businesses can harness their development in emerging technologies to meet big data challenges. The speakers will also discuss how firms are looking to develop and deploy technology to maximize data and explore the underlying benefits and use cases.

## **Robert Palatnick**

*Managing Director and Chief Technology Architect*

### **WHO IS REGULATION FOR IN SECURITIES MARKETS? AFTER ALL THAT INVESTMENT, WHO HAS BENEFITED THE MOST?**

**Wednesday, October 24, | 9:45-10:45**

Increasing regulatory reporting requirements are impacting financial institutions with increased costs and additional risks of being hit with large fines. The end goal of these regulatory investments was to make markets, safe, drive down costs and improve transparency to protect the end investor. How have end investors benefited from key regulations to date? And what return on this investment has been seen by the institutions?

### **WILL DLT BE THE LONG WAITED TECHNOLOGY REVOLUTION FOR THE SECURITIES POST-TRADE INDUSTRY?**

**Wednesday, October 24 | 2:00 – 3:00**

The securities pre-trade and trade services have seen on-going transformation over the past 20 years. Electronic trading, algorithmic trading, HFT amongst others, have modified the trading floors. Is it now the time for post-trade services to be more fashionable and be viewed as an opportunity? Will technology such as DLT close the gaps between the pre- trade/trade and the post trade floors? Will crypto assets be custodied in a similar way as today with the same infrastructure providers – (Global) Custodians and CSDs?
