EMIR Reporting Service Fee Schedule – Intermediate Service

The Intermediate is responsible for paying all fees incurred by their End Clients.

The services and functionality available to the End Client are limited as set out in the Intermediate Service Functional Description, which DTCC Derivatives Repository Ltd. may, at its sole discretion, revise from time-to-time.

The Access Fee is payable by the Intermediate for each End Client they act on behalf of. This fee is graduated depending on the number of End Clients the Intermediate acts on behalf of. The lower Access Fee, if applicable, will apply to the entire population of End Clients introduced by the Intermediate once the threshold indicated above is exceeded.

The Access Fee is payable for each End Client for each calendar month or part thereof and not refundable in the event of the termination of an End Client during a month.

For an End Client with 6 or more open OTC Derivative (including OTC FX and Forward) positions or 6 or more ETD transactions the Intermediate shall pay the Standard Access Fee. For an End Client with 5 or less open OTC Derivative (including OTC FX and Forward) positions and 5 or less ETD transactions the Intermediate shall pay the Value Access Fee. If an End Client crosses the 5 OTC Derivative (including OTC FX and Forward) positions or 5 ETD transactions limits in any month in a calendar year, the Intermediate will automatically be billed at the higher Standard tier for that month and subsequent months in that calendar year for that End Client.

An “OTC Derivative” is any OTC derivative product that is not a Commodity Forward, FX Forward, FX Swap, CFD or PSA.

An “OTC FX and Forward” is any product that is a Commodity Forward, FX Forward, FX Swap, CFD, or PSA.

OTC Derivative and OTC FX and Forward fees are payable monthly and are calculated based on the number of positions reported for the End Client by the Intermediate. All OTC Derivative lifecycle events and modifications are free of charge.

An “ETD” transaction is a record or report of the trade execution once cleared (commonly referred to as “listed cleared execution”).

ETD fees are payable monthly and are calculated based on the number of transactions reported for the End Client by the Intermediate. There are no ETD charges for positions.

All valuation and collateral records are free of charge as they relate to existing positions.

All fees are exclusive of VAT or other applicable sales or value based taxes.

All fees are payable monthly in arrears.
