

Achieve More with DTCC's Insurance Information Exchange (IIEX)

TRANSFORM YOUR DATA ACCESS & EXCHANGE

Many insurance organizations struggle with operational inefficiencies due to lack of easy access to data and resources to build out an extensive exchange solution. DTCC's **Insurance Information Exchange (IIEX)** offers an automated suite of secure, streamlined data processing services that support carriers and their distribution partners exchanging data throughout the annuity and insurance lifecycles. These services are ready for use without any complex buildouts and allow users to easily access data through APIs on-demand.

Centralized hub for storing and transacting data

Near real-time automated data processing

Flexible data sourcing and authorization levels

Compliance-driven infrastructures

Data exchanges for policy, product and producer data throughout lifecycles

Intuitive user interface with advanced search and reporting capabilities

Supporting both carriers & their distribution partners

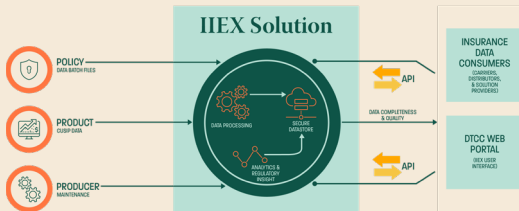

Data access via portal and APIs

Ready-made software with no build out required

INSURANCE INFORMATION EXCHANGE (IIEX)

Accessible from a user interface and purpose-driven APIs, IIEX gives users the flexibility to source, consume and transact in-force policy, product and producer data as well as achieve insights into data quality completeness scores that leverage business defined critical attributes.

BENEFITS:

- Creates time efficiencies by reducing data exchange via multiple methods & providing on-demand access
- Allows for focus shifts back towards client relationships, up-selling & new sales
- Promotes data-driven decisions
- Provides security and supports risk mitigation
- Ability to quickly expand business
