4 Message Datatypes

Note The following chapter identifies the datatypes that are used in the message.

4.1 DTCCSubEventType11Code

Definition: Specifies DTCC (The Depository Trust and Clearing Corporation) defined sub event types.

Type: CodeSet

Code	Name	Definition
A144	USLegal144A	Identifies an exchange offer on securities that are subject to Securities Rule 144A.
ADRS	ADR	Identifies when the event security is an ADR. The underlying security is American Depositary Receipt.
BLOT	BoardLot	Identifies a change in Board Lot size.
BTST	BidTenderSealedTender	Identifies a tender offer event in which the holder can choose the price at which they are willing to tender their securities. This price may or may not be accepted by the offeror.
C305	DeemedDividend305C	Identifies an event which has been considered a deemed distribution under Section 305(c) of the United States Internal Revenue Code.
CASE	CashAndSecurities	Identifies an event where the payout will be both cash and securities.
CASH	Cash	Identifies an event where the payout will be cash.
CILI	CashinLieu	Identifies DTC (the Depository Trust Company) specific sub-event where holders can elect to "sell" whole shares to satisfy fractional entitlements (usually as a result of a merger) at the beneficial owner level.
CONV	Conversion	Identifies an event which is a full call or a maturity with conversion.
COTE	ConvertAndTender	Identifies a tender offer with a convert feature.
CTAX	TaxCredit	Identifies an event where a tax credit relating to the Build America Bonds will occur.
CUPR	NameAndCUSIPChangeAndPresentationRequired	Name change with both CUSIP change and presentation required.
CUSP	NameAndCUSIPChange	Name change with CUSIP change.
DRPD	DividendReinvestmentByDTC	Identifies an event where the Issue is eligible for a Dividend Reinvestment program at DTCC (The Depository Trust and Clearing Corporation).

Code	Name	Definition
DRPI	DividendReinvestmentByIssuer	Identifies an event where the issuer offers a dividend reinvestment program that is not processed by DTC (the Depository Trust Company).
ECNI	AmountsInExcessOfCumulativeNetIncome	Identifies when a publicly traded partnership identifies the amount realised on such portion of the distribution as an amount in excess of cumulative net income under IRS regulation 1.1446(f)-4(c)(2)(iii).
FTPR	OfferToPurchase	Identifies a tender offer event made by another company to purchase a portion or all of the outstanding shares.
GDRS	GDR	Identifies when the event security is a GDR. The underlying security is a global depository receipt.
M871	DividendEquivalentPayment871M	Identifies an event which has been considered a dividend equivalent payment under Section 871(m) of the United States Internal Revenue Code.
MBCK	MortgageBacked	Indicates an event where the issue has an early redemption feature that allows the holder to elect to sell bonds back to the issuer on a monthly basis, according to specified conditions.
MITE	MiniTender	Identifies when a tender offer is a mini tender.
MROS	MandatoryRedemptionOfShares	Identifies an event where redemption shares are issued in addition to shares of the original security. This is related to the Mandatory Exchange event with the same sub-event type name.
NOTI	ImportantNotice	Identifies a MMI Important Notice.
OPOF	OpenOffer	Identifies an event in certain markets where underlying rights are not issued.
OPTO	OptOut	Identifies an event (for example Cash Dividend) where DTC (the Depository Trust Company) offers a DRIP option as a default option (holder must opt out of the DRIP Option).
PLCL	PlaceOfListing	Identifies a change in the place where the security is listed.
POPI	PoisonPill	Identifies sale of rights event where issuers redeem poison pill rights.
PREQ	PresentationRequired	Identifies an event where the presentation of securities will be required.
PRNI	PhysicalRightsNotIssued	Identifies an event where the company is not issuing a security with the right to subscribe for additional shares. In these instances, a User CUSIP is created by DTC (The Depository Trust Company) as opposed to a company-issued CUSIP in order to identify these issues.

Code	Name	Definition
QN92	ExemptionQualifiedNotice92Days	Identifies a qualified notice issued by a publicly traded partnership that states applicability of the 10 percent exception under IRS regulation 1.1446(f)-4(b)(3).
RCLA	Classification1042S	Identifies distributions that have multiple components for tax withholding and 1042-S reporting purposes.
RDTH	BasedOnRecordDateHoldings	Identifies an event which will be based on record date holdings.
REGS	RegulationS	Identifies an exchange offer on securities that are subject to securities rule Reg S.
RMRK	Remarketing	Identifies an event that involves a Stock Purchase Contract product that is offering an early settlement or remarketing feature prior to the contract's expiration.
SALE	SaleOfAssets	Identifies an event where the distribution is from the proceeds of the sale of assets.
SECU	Securities	Identifies an event where the payout will be securities.
SETE	SelfTender	Identifies when a tender offer is a self tender.
SHEX	ShareExchange	Identifies an event where two companies exchange their shares during a merger. After the share exchange, one company becomes a subsidiary of the other and is no longer listed. Usually applicable to an event in JP markets.
SHPP	SharePurchasePlan	Identifies an event involving the offer of shares by a corporation listed on the Australia Stock Exchange, in which ASIC will give relief so that the company can offer existing shareholders the opportunity to acquire small numbers of additional shares without needing a disclosure document or Product Disclosure Statement (PDS).
SOPT	SurvivorOptions	Indicates an event where the Issue has an early redemption feature. This feature allows the holder to elect to sell bonds back to the issuer on a predetermined basis (excluding monthly) according to specific priorities.
SPAC	SpecialPurposeAcquisitionCompany	Specified purpose acquisition companies (SPACs) are public companies comprised of cash available to investors in financial markets. The sole purpose of SPACs is to use the proceeds to finance a future acquisition. SPACs generally commit to identify a target operating company and complete a business combination transaction within a specified timeframe. SPACs have a feature where funds are put into a trust account and when the target investment is identi-

Code	Name	Definition
		fied the investor can have their proceeds returned or participate in the business combination.
STDT	Standard	Identifies an event where one company merges with the other and assumes the name of the surviving company. It is the standard market-accepted merger. Usually applicable to an event in JP markets.
TWRI	TenderWithRights	Identifies a tender offer event on a Rights security. Holders must submit both the ordinary share(s) and right(s) to be eligible to receive the tender consideration. The ratio of ordinary shares to rights is defined in the offer.
UNIT	UnitCombination	Identifies a combination of assets or types of assets packaged together and sold as one. For example, a shareholder buying one unit of company stock may get preferred shares, ordinary shares and even warrants in the unit.
UNWD	Unwind	Identifies an event where "unwinding" of the basket of securities occurs.
VOTE	Vote	Event where creditors whose claims are impaired are entitled to vote.
WITH	WithPayout	Identifies a consent event with payout.
WITO	WithoutPayout	Identifies a consent event without payout.
XFER	Transfer	Identifies an event where one company transfers all of its shares to a newly created company. Usually applicable to an event in JP markets.

4.5 ExtendedEventType6Code

Definition: Specifies DTCC (The Depository Trust and Clearing Corporation) defined corporate action event type.

Type: CodeSet

Code	Name	Definition
CDRD	CertificateOfDepositEarlyRedemption	Feature of a security that allows an issuer to make a payment to the security holder. This event will be used for securities subject to redemptions other than those categorised as full and partial calls (for example early Certificate of Deposit redemptions).
FPAY	FinalPaydown	Final distribution of principal due on a security, typically Collateralised Mortgage Obligations.
REDW	RedemptionOfWarrant	Event is a redemption of warrant.

Code	Name	Definition
TMTN	Termination	Security, usually a form of a derivative, for which the agent or issuer has decided to terminate the derivative based on a change to the underlying security(ies) or a change in strategy. Distinguishes from Mandatory Exchange, Exchange Offer event types mapped to the same ISO event type code.

Used in element(s)

"EventType" on page 6

Restricts

"ExtendedEventTypeV2Code" on page 17

4.6 ExtendedEventTypeV2Code

Definition: Specifies DTCC (The Depository Trust and Clearing Corporation) defined corporate action event type.

Type: CodeSet

Code	Name	Definition
BRIS	BonusRightsIssue	Security holders are issued additional securities, free of payment, from the issuer in proportion to their holdings. A bonus issue is typically represented by shares or warrants. Nominal value does not change. The security holder may be offered choice of entitlement. Distinguishes from Rights Subscription, Sale Of Rights event types mapped to the same ISO event type code.
CDRD	CertificateOfDepositEarlyRedemption	Feature of a security that allows an issuer to make a payment to the security holder. This event will be used for securities subject to redemptions other than those categorised as full and partial calls (for example early Certificate of Deposit redemptions).
FLPR	FullPrerefunding	Exercise of a privilege by the issuer to repay, in full, any debt security prior to maturity when the issuer deposits assets in trust. This irrevocably restricts their use to satisfaction of the debt. Distinguishes from "partial defeasance", "partial prerefunding" event types mapped to the same ISO event type code.
FPAY	FinalPaydown	Final distribution of principal due on a security, typically Collateralised Mortgage Obligations.
MEET	Meeting	Meeting of a company's share or bond holders to address resolutions put forth by the issuer. Note: this is information

Code	Name	Definition
		only event. Pending deprecation and migration to ISO Proxy Message suite.
PDEF	PartialDefeasance	Issuer sets aside funds in escrow to guarantee payment for the portion of the security on maturity date. Defeased and Non-defeased cusips are issued respectively for the defeased and non-defeased portions.
PPRE	PartialPrerefunding	Issuer sets aside funds in escrow to guarantee payment for the portion of the security prior to maturity date. Refunded and Non-Refunded cusips are issued respectively for the refunded and non-refunded portions.
PPUT	PartialMandatoryPut	The mandatory exchange of a portion of bonds where the exchanged securities are usually remarketed. The issuer may offer holders the right to retain instead of exchanging their securities.
REDW	RedemptionOfWarrant	Event is a redemption of warrant.
RPLA	RightsPlanAdoption	General information provided by the issuer that should not result in material changes to the security.
TMTN	Termination	Security, usually a form of a derivative, for which the agent or issuer has decided to terminate the derivative based on a change to the underlying security(ies) or a change in strategy. Distinguishes from Mandatory Exchange, Exchange Offer event types mapped to the same ISO event type code.
