EXECUTIVE SUMMARY

In February 2015, CPMI-IOSCO issued its final report on Quantitative Disclosure Standards for Central Counterparties (“CCPs”), which provides specific quantitative disclosure requirements for CCPs relative to a number of the PFMI principles. These disclosures are intended to complement the narrative disclosures included in the CPMI-IOSCO Disclosure Framework*. This document contains the quantitative disclosures for the two divisions of the Fixed Income Clearing Corporation (“FICC”) — the Government Securities Division (“GSD”) and Mortgage-Backed Securities Division (“MBSD”) — and the National Securities Clearing Corporation (“NSCC”). FICC and NSCC are wholly owned subsidiaries of The Depository Trust & Clearing Corporation (“DTCC”).

The attached disclosures include, in addition to those required by CPMI-IOSCO, some supplemental disclosures as proposed by the Payments Risk Committee’s Recommendations for Supporting Clearing Member Due Diligence of Central Counterparties (Feb 2013).

The information provided in this disclosure is reported as of the dates specified. For further information, please contact
CPMI-IOSCO_Quant@dtcc.com.

* The Disclosure Frameworks for FICC and NSCC can be found at www.dtcc.com

Q3 2025 SUPPLEMENTAL EXPLANATORY NOTE

Management Note

The U.S. equity markets rose during the third quarter of 2025, with the S&P 500 index increasing approximately 7.79%, and increasing 13.72% for the first three quarters of the year. In line with the quarter-point cut to the Federal Funds Rate coming out of the 09/17/2025 Federal Open Market Committee meeting, Treasury yields ended the quarter lower across the curve, with the 10-year U.S. Treasury yield down from 4.26% at the beginning of the quarter to 4.16% by the end of September 2025.

FICC-Government Securities Division (GSD)

At the end of the third quarter of 2025, GSD's 12-month backtesting coverage level was 99.7%. The 1-month coverage ratio at GSD was 99.69% for July, 99.86% for August, and 99.75% for September. The largest deficiency for the quarter totaled \$48.6MM observed on 07/02/2025 and was driven by positions change. The median backtesting deficiency for the quarter was \$3.9MM.

FICC-Mortgage-Backed Securities Division (MBSD)

At the end of the third quarter of 2025, MBSD's 12-month backtesting coverage level was 99.7%. The 1-month coverage ratio at MBSD was 99.85% for July, 99.52% for August, and 99.84% for September. The largest deficiency for the quarter totaled \$24.8MM observed on 08/04/2025 and was driven by positions change. The median backtesting deficiency for the quarter was \$1.3MM.

National Securities Clearing Corporation (NSCC)

At the end of the third quarter of 2025, NSCC's 12-month backtesting coverage level was 99.8%, with the 1-month coverage ratio for July at 99.96%, August at 99.89%, and September at 99.96%. The largest deficiency for the quarter was \$172.9MM, which occurred on 07/21/2025, driven by a trade with an affiliate account.

Q3 2025 SUPPLEMENTAL EXPLANATORY NOTE

Liquidity Results

GSD, MBSD, and NSCC did not experience a default event nor did any Member fail to satisfy payment obligations in Q3 2025. No simulated default liquidity sufficiency shortfalls were observed in Q3 2025.

For GSD and MBSD, the values are estimated liquidity obligations, post netting, that are based on trades that are due to settle the following business day plus funds-only settlement ("FOS"). The liquidity results reflect GSD and MBSD's potential liquidity obligations in a Member default scenario. Liquidity obligations are measured against the sum of qualifying liquid resources ("QLR") available for each GSD and MBSD respectively. QLR includes cash deposits to the Clearing Fund and the Capped Contingency Liquidity Facility ("CCLF") in extreme but plausible market conditions. For GSD, one such assumption excludes all cash and clearing fund securities collected from GSD customer segregated margin accounts under Exchange Act Rule 15c3-3. As of September 30, 2025, there was one open segregated margin account.

For NSCC, the values are estimated liquidity obligations that are based on obligations throughout the settlement cycle plus the Long Allocation and Cross Account Liquidity Methodology ("CALM") offsets. The total reflects, where relevant, intraday and multiday payment obligations that could be caused by the default of any single participant and its affiliates (including transactions cleared for indirect participants) in extreme but plausible market conditions.

The liquidity results reflect NSCC's potential liquidity obligations in a Member default scenario. In a non-default scenario, NSCC's Members have cash obligations for all securities deliveries (buy positions). Those cash obligations are netted with cash received for all securities deliveries (sell positions). If a portfolio is balanced with buys/sells, these settlement amounts will largely offset.

In a default scenario, NSCC is responsible for the receipt of securities from, and payment of cash to, the contra side Members (buy positions). This represents the exposure that is published in this report. NSCC may also need to source securities that the defaulting Member was unable to deliver (sell positions). The liquidity obligations of the sell positions pair-off, as NSCC would exchange settlement proceeds between the two contra side Members. As such, the buy positions drive the potential default liquidity risk that is posed to NSCC, since NSCC would be responsible for the payment of cash required to settle those purchases. Therefore, NSCC's conservative liquidity results derived from a default scenario are not comparable to the non-default settlement obligations of its Members.

Liquidity results also reflect the fact that NSCC receives option activity from the Options Clearing Corporation ("OCC") each business day, but activity on non-expiry dates is not as significant as the activity observed around standard expiration periods. Liquidity obligations are conservatively calculated and liquidity resources are measured assuming the guarantee for OCC options has been transferred to NSCC. Liquidity risk measurement is calibrated extremely conservatively to address uncertainty of potential outcomes; resources are likely to increase during periods of stress over a 4-day default period, but no such increases are considered as potential risk mitigation.

NSCC uses SLD, a payment obligation, determined by whether the daily liquidity obligation on a business day exceeds the sum of NSCC's QLR available to NSCC, after the application of a wide range of stressed market assumptions. The SLD payment obligation is based on the calculated QLR and actual liquidity exposure over the upcoming settlement cycle that a Member's daily activity would pose to NSCC on that particular day in the event of that Member's default. NSCC did not hold any SLD on deposit during Q3. SLD is part of NSCC's diversified set of liquidity resources. QLR includes cash deposits to the NSCC Clearing Fund; proceeds of the issuance and private placement of (a) short-term, unsecured notes in the form of commercial paper and extendable notes and (b) term debt; and cash that would be obtained by drawing on NSCC's committed 364-day credit facility with a consortium of banks. The SLD rule is Rule 4A in the NSCC rulebook that can be accessed via https://www.dtcc.com/~media/Files/Downloads/legal/rules/nscc_rules.pdf. Full text of the SLD filings may be obtained by visiting the DTCC website at www.dtcc.com/legal/sec-rule-filings.

Disclosure Reference	Disclosure Description	Frequency	Data Type	FICC		NSCC	Explanatory Notes	
				GSD	MBSD			
Disclosure 4.1 - Total value of default resources (excluding initial and retained variation margin), split by clearing service if default funds are segregated by clearing service								
4.1.1	Prefunded - Own Capital Before	Quarterly/ Quarter End	USD \$MM				The Company maintains an amount referred to as the corporate contribution, to be applied to losses of the Company as provided in the clearing agency rules. The amount of the corporate contribution is generally equal to 50% of the Company's general business risk capital requirement.	
4.1.2	Prefunded - Own Capital Alongside		USD \$MM	N/A	N/A	N/A		
4.1.3	Prefunded - Own Capital After		USD \$MM	N/A	N/A	N/A		
4.1.4	Prefunded - Aggregate Participant Contributions - Required		USD \$MM	64,916	10,092	13,664	NSCC and each FICC Division calculates and collects Clearing Fund from its Members using a risk-based margin methodology. These amounts (a Member's "Required Fund Deposit") operate as the Member's margin, and the aggregate of all such Members' deposits is, collectively, the Clearing Fund, which operates as NSCC's/FICC (with respect to each division's) default fund.	
4.1.5	Prefunded - Aggregate Participant Contributions - Post-Haircut Posted		USD \$MM	77,747	11,863	14,848		
4.1.6	Prefunded - Other		USD \$MM	N/A	N/A	N/A

Disclosure 4.4 - Credit Risk Disclosures								
4.4.1	State whether the CCP is subject to a minimum "Cover 1" or "Cover 2" requirement in relation to total pre-funded default resources.	Quarterly		Cover 1	Cover 1	Cover 1		
4.4.2	For each clearing service, state the number of business days within which the CCP assumes it will close out the default when calculating credit exposures that would potentially need to be covered by the default fund.		Bus. Days	3	3	3	This is our risk horizon for liquidation and hedging of market risk.	
4.4.3.1	For each clearing service, the estimated largest aggregate stress loss (in excess of initial margin) that would be caused by the default of any single participant and its affiliates (including transactions cleared for indirect participants) in extreme but plausible market conditions. (Previous 12 Months)		Peak Day/ Previous 12 Months	USD \$MM	3,588	3,386	2,433	Amounts correspond to largest Cover 1 ratio. This may not correspond to the largest stress loss amount observed during the look-back period.
4.4.3.2			Mean Avg/ Previous 12 Months	USD \$MM	2,273	2,218	533	
4.4.4	Report the number of business days, if any, on which the above amount (4.4.3) exceeded actual pre-funded default resources (in excess of initial margin).		Bus. Days	0	0	0		
4.4.5	The amount in 4.4.3 which exceeded actual pre-funded default resources (in excess of initial margin) (Previous 12 Months)		Amt Exceeded/ Previous 12 Months	USD \$MM	0	0	0	
4.4.6.1	For each clearing service, the actual largest aggregate credit exposure (in excess of initial margin) to any single participant and its affiliates (including transactions cleared for indirect participants) (Previous 12 Months)		Peak Day/ Previous 12 Months	USD \$MM				Amount represents Peak/Average VaR model back test results.
4.4.6.2			Avg/ Previous 12 Months	USD \$MM				
4.4.7.1	For each clearing service, the estimated largest aggregate stress loss (in excess of initial margin) that would be caused by the default of any two participants and their affiliates (including transactions cleared for indirect participants) in extreme but plausible market conditions (Previous 12 Months)	Peak Day/ Previous 12 Months	USD \$MM	5,729	4,173	3,066	Amounts correspond to largest Cover 2 ratio. This may not correspond to the largest Cover-2 stress loss amount observed during the look-back period.	
4.4.7.2		Mean Avg/ Previous 12 Months	USD \$MM	4,042	3,677	749		

Disclosure Reference	Disclosure Description		Frequency	Data Type	FICC		NSCC	Explanatory Notes
					GSD	MBSD		
4.4.8	Number of business days, if any, on which the above amount (4.4.7) exceeded actual pre-funded default resources (in excess of initial margin) and by how much.			Bus. Days	0	0	0	Total number of business days where the largest Cover 2 ratio per day exceeded 100% for the last 12 months of this test period. Excess amounts above pre-funded default resources (in excess of initial margin) corresponding to these business days are referenced below in 4.4.9 explanatory notes, when applicable.
4.4.9	The amount in 4.4.7 which exceeded actual pre-funded default resources (in excess of initial margin) (Previous 12 Months)	Amt Exceeded/ Previous 12 Months		USD \$MM	0	0	0	
4.4.10.1	For each clearing service, what was the actual largest aggregate credit exposure (in excess of initial margin) to any two participants and their affiliates (including transactions cleared for indirect participants)? (Previous 12 Months)			USD \$MM				Amount represents Peak/Average VaR model back test results.
4.4.10.2				USD \$MM				
Disclosure 5.1 - Assets eligible as initial margin, and the respective haircuts applied								
5.1.1	Assets eligible as initial margin and the respective haircuts applied		Update as changes are made	Website/ Hyperlink	See Explanatory Notes	See Explanatory Notes	See Explanatory Notes	GSD: https://www.dtcc.com/-/media/Files/Downloads/legal/risk-management/GSD-Haircut-Schedule-Current.pdf MBSD: https://www.dtcc.com/-/media/Files/Downloads/legal/risk-management/MBSD-Haircut-Schedule-Current.pdf NSCC: https://www.dtcc.com/-/media/Files/Downloads/legal/risk-management/NSCC-Haircut-Schedule-Current.pdf
Disclosure 5.2 - Assets Eligible for pre-funded participant contributions to the default resources, and the respective haircuts applied (if different from 5.1)								
5.2.1	Assets Eligible for pre-funded participant contributions to the default resources, and the respective haircuts applied (if different from 5.1)		Update as changes are made		See 5.1	See 5.1	See 5.1	
Disclosure 5.3 - Results of testing of haircuts								
5.3.1	Confidence interval targeted through the calculation of haircuts		Quarterly	Percentage	99.00%	99.00%	99.00%	
5.3.2	Assumed holding/liquidation period for the assets accepted			Bus. Days	3	3	3	See Explanatory Note from 4.4.2

Disclosure Reference	Disclosure Description	Frequency	Data Type	FICC		NSCC	Explanatory Notes
				GSD	MBSD		
5.3.3	Look-back period used for testing the haircuts			10+ years	10+ years	10+ years	For Treasury and Agencies the lookback period, "10+ years", starts Jan 1, 2008 and continues to the last day of this quarter tested & reported herewith. Similar to current scenario selection or retention approach, where Historic Stress Scenario Dates are selected from a timespan of more than 10 years (utilizing a fixed start date and extending the end date), or retained for all Historic Scenario Dates previously derived which are on or after Jan 1, 2008. For Mortgages, Historic Stress Scenarios are selected from a 10+ years look-back period starting in 2002 and applied to CUSIPs selected from the 3 months of the quarterly test period.
5.3.4	Number of days during the look-back period on which the fall in value during the assumed holding/liquidation period exceeded the haircut on an asset.		Bus. Days	Treasury 4 days. Mortgages total of 44 days. Agency 0 days.	Treasury 4 days. Mortgages total of 44 days. Agency 0 days.	Treasury 4 days. Mortgages total of 44 days. Agency 0 days.	See 5.1 for list of eligible assets and the respective Haircuts (HC) applied. For Treasuries based on the "10 years +" lookback period (including 2008 and onward), four days were observed for Zero-Coupon Treasury STRIPS with tenures of 25 years and up, where a change in rate caused a breach of the respective HC. For Mortgages there were 44 days in Q3 2025 where at least one breach occurred and in total, the stress return (loss) for 8 CUSIPs under one historic stress scenario breached the current HC. For Agencies no breaches were observed under current HCs.

Disclosure 6.1 - Total initial margin required split by house, client gross, client net and total (if not segregated)

Disclosure Reference	Disclosure Description	Frequency	Data Type	GSD	MBSD	NSCC	Explanatory Notes

Disclosure Reference	Disclosure Description	Frequency	Data Type	FICC		NSCC	Explanatory Notes	
				GSD	MBSD			
Disclosure 6.3 - Initial Margin rates on individual contracts, where the CCP sets such rates								
6.3.1	Initial Margin rates on individual contracts where the CCP sets such rates	Update as changes are made		N/A	N/A	N/A		
Disclosure 6.4 - Type of initial margin model used (e.g. portfolio simulation or risk aggregation) for each clearing service and the key model design parameters for each initial margin model applied to that clearing service								
6.4.1	Type of initial margin model used (e.g. portfolio simulation or risk aggregation) for each clearing service and the key model design parameters for each initial margin model applied to that clearing service	Update as changes are made		Historical Simulation + Haircut	Historical Simulation + Haircut	Parametric VaR + Haircut		
Disclosure 6.5 - Results of back-testing of initial margin. At a minimum, this should include, for each clearing service and each initial margin model applied to that clearing service								
6.5.1.1	Number of times over the past twelve months that margin coverage held against any account fell below the actual mark-to-market exposure of that member account – based on daily back-testing results	Once-a-day/ Previous 12 Months	Quarterly	Count	87	49	52	
6.5.2	Number of observations ((Number of accounts * number of days))	Previous 12 Months		Count	32,741	14,949	32,012	
6.5.3	Achieved coverage level [aggregate CCP-level backtest coverage]	Previous 12 Months		Percentage	99.73%	99.67%	99.84%	Aggregate CCP-level backtest coverage (SEC Mthly Back Test report)
6.5.4	Where breaches of initial margin coverage (as defined in 6.5(a)) have occurred, report on size of uncovered exposure	Peak Size/ Previous 12 Months		USD \$MM	133	321	343	Peak Coverage Level at CC Level over the last 12-month at the quarter-end
6.5.5		Average Size/ Previous 12 Months		USD \$MM	21	16	35	Average magnitude of Backtest deficiencies over last 12 months
Disclosure 6.6 - Average Total Variation Margin Paid to the CCP by participants each business								
6.6.1	Average Total Variation Margin Paid to the CCP by participants each business day	Average	Quarterly	USD \$MM	11,806	427	636	For GSD and MBSD, VM is a cash pass-through process across the Members; for NSCC, VM charges are included as part of the Clearing Fund requirements. MTM debits were aggregated across all Members to reflect the variation margin paid to all Members and include both CNS and SFT MTM debits.
Disclosure 6.7 - Maximum total variation margin paid to the CCP on any given business day over the period								
6.7.1	Maximum total variation margin paid to the CCP on any given business day over the period	Maximum	Quarterly	USD \$MM	19,095	1,799	6,776	See Explanatory Note from 6.6
Disclosure 6.8 - Maximum aggregate initial margin call on any given business day over the period								

Disclosure Reference	Disclosure Description		Frequency	Data Type	FICC		NSCC	Explanatory Notes
					GSD	MBSD		
6.8.1	Maximum aggregate initial margin call on any given business day over the period	Maximum	Quarterly	USD \$MM	6,653	1,240	13,418	Amount represents the largest aggregate deficit over amounts on deposit. This is the actual call made, to be reduced by any excess collateral that was held. Call amount would be inclusive of any intraday calls made.

Disclosure 7.1 - Liquidity Risk								
7.1.1	State whether the clearing service maintains sufficient liquid resources to 'Cover 1' or 'Cover 2'.		Quarterly/ Quarter End		Cover 1	Cover 1	Cover 1	
7.1.2	Size and composition of qualifying liquid resources for each clearing service; (a) Cash deposited at a central bank of issue of the currency concerned			USD \$MM	14,846	2,787	24,746	
7.1.3	Size and composition of qualifying liquid resources for each clearing service; (b) Cash deposited at other central banks			USD \$MM	0	0	0	
7.1.4	Size and composition of qualifying liquid resources for each clearing service; (c) Secured cash deposited at commercial banks (including reverse repo)	Repo Only		USD \$MM	0	0	0	
7.1.5	Size and composition of qualifying liquid resources for each clearing service; (d) Unsecured cash deposited at commercial banks	Commercial Bank Deposits		USD \$MM	500	125	1,375	
		Money Market Funds		USD \$MM	0	0	0	
		US Treasury Bills		USD \$MM	0	0	0	
7.1.6	Size and composition of qualifying liquid resources for each clearing service; (e) secured committed lines of credit (ie those for which collateral/security will be provided by the CCP if drawn) including committed foreign exchange swaps and committed repos			USD \$MM	114,345	98,669	9,600	For FICC, amount represents the assigned total amount of rules-based facility, Capped Contingency Liquidity Facility ("CCLF") for the reported quarter. For NSCC, the amount represents a secured line of credit with a syndicate of lenders.
7.1.7	Size and composition of qualifying liquid resources for each clearing service; (f) unsecured committed lines of credit (ie which the CCP may draw without providing collateral/security)			USD \$MM	N/A	N/A	N/A	
7.1.8	Size and composition of qualifying liquid resources for each clearing service; (g) highly marketable collateral held in custody and investments that are readily available and convertible into cash with prearranged and highly reliable funding arrangements even in extreme but plausible market conditions			USD \$MM	N/A	N/A	N/A	

Disclosure Reference	Disclosure Description	Frequency	Data Type	FICC		NSCC	Explanatory Notes
				GSD	MBSD		
7.1.9	Size and composition of qualifying liquid resources for each clearing service; (h) other		USD \$MM	N/A	N/A	0	<p>For GSD and MBSD, the portfolio of a defaulting member, comprised of highly marketable collateral would also be available as a liquidity resource. Value and composition of that portfolio would vary by day and by member. For GSD/MBSD, amount represents the Repo Value of Underlying Securities.</p> <p>NSCC's Supplemental Liquidity Deposit ("SLD") program provides for additional rules-based liquidity. Option expiry settlement cycles typically present elevated liquidity needs to NSCC. Members may be required to provide additional funding based on historical activity. Sizing of supplemental liquidity resources will vary based on the historical activity presented by NSCC's largest members as well as market dynamics during the current settlement cycle. As of 9/30/25 there were no SLD deposits on hand. Please see Supplemental Note for additional information.</p> <p>Resources reported in Section 7.1 are as of 9/30/25 and do not correspond to the dates of the actual largest obligations.</p>
7.1.10	State whether the CCP has routine access to central bank liquidity or facilities.			N/A	N/A	N/A	
7.1.11	Details regarding the schedule of payments or priority for allocating payments, if such exists, and any applicable rule, policy, procedure, and governance arrangement around such decision making.			N/A	N/A	N/A	No schedule of payments or priority for allocating payments exists.

Disclosure 7.2 - Size and composition of any supplementary liquidity risk resources for each clearing service above those qualifying liquid resources above.

7.2.1	Size and composition of any supplementary liquidity risk resources for each clearing service above those qualifying liquid resources in 7.1	Quarterly/ Quarter End	USD \$MM	0	0	N/A	FICC has entered into uncommitted master repurchase agreements ("MRAs") which it may look to as a liquidity source in addition to the resources discussed in the explanatory note from 7.1. These are not designated as qualifying liquid resources. Amounts available under the MRAs cannot be quantified.
-------	---	---------------------------	----------	---	---	-----	---

Disclosure 7.3 - Liquidity Risk

7.3.1	Estimated largest same-day and, where relevant, intraday and multiday payment obligation in total that would be caused by the default of any single participant and its affiliates (including transactions cleared for indirect participants) in extreme but plausible market conditions	Forward looking/ Quarterly	USD \$MM	85,554	39,698	37,867	See Supplemental Note
7.3.2	Number of business days, if any, on which the above amount exceeded its qualifying liquid resources (identified as in 7.1, and available at the point the breach occurred), and by how much.	Quarterly	Bus. Days	0	0	0	See Supplemental Note
7.3.3			USD \$MM	0	0	0	See Supplemental Note
7.3.4	Actual largest intraday and multiday payment obligation of a single participant and its affiliates (including transactions cleared for indirect participants) over the past twelve months; Peak day amount in previous twelve months	Previous 12 Months	USD \$MM	87,958	39,698	57,403	See Supplemental Note
7.3.5	Estimated largest same-day and, where relevant, intraday and multiday payment obligation in each relevant currency that would be caused by the default of any single participant and its affiliates (including transactions cleared for indirect participants) in extreme but plausible market conditions	Forward looking/ Quarterly	USD \$MM	85,554	39,698	37,867	See Supplemental Note

Disclosure 17.1 - Operational availability target for the core system(s) involved in clearing (whether or not outsourced) over specified period for the system							
17.1.1	Operational availability target for the core system(s) involved in clearing (whether or not outsourced) over specified period for the system	Quarterly	Percentage	99.70%	99.70%	99.70%	This target and the actual results below are calculated at the individual product-line level and then averaged across all of the systems identified below, in accordance with the established calculation for the applicable SLA.

Disclosure 17.2 - Actual availability of the core system(s) over the previous twelve month period							
17.2.1	Actual availability of the core system(s) over the previous twelve month period	Quarterly	Percentage	99.98%		99.97%	Availability is calculated across multiple systems. Specifically, CMU, CNS, NSCC Risk Management, FICC Risk Management, GSD, MBSD and Trade Capture.

Disclosure 17.3 - Total number of failures							
17.3.1	Total number of failures and duration affecting the core system(s) involved in clearing over the previous twelve month period (Duration of Failure)	Quarterly	Count / hh:mm:ss		0 / 0:00:00		Regulation Systems Compliance and Integrity (Regulation SCI) events for NSCC, GSD, and MBSD over the previous twelve month period are reviewed for Disclosure 17.3 reporting. Regulation SCI events that impact core systems used in clearing that enable the acceptance and novation of trades, and enable the calculation of margin and settlement obligations are assessed by Risk Management, Product Management, Regulation SCI personnel, and Legal to confirm total number of incidents and duration of failures. Incidents that do not result in a direct business impact to clients are not reported as a failure for Disclosure 17.3.

Disclosure 17.4 - Recovery time objective(s)							
17.4.1	Recovery time objective(s) (e.g. within two hours)	Quarterly	Time	within 2 hours	within 2 hours	within 2 hours	Recovery time objective is within 2 hours.
Disclosure 18.1 - Number of clearing members, by clearing service							
							<p><i>For GSD, there are Broker/Dealers, Government Sponsored Entities, Banks, and Hedge Funds</i></p> <p><i>For MBSD, there are Broker/Dealers, Hedge Fund, Mortgage Companies, Government Sponsored Entities, Registered Investment Companies, etc.</i></p> <p><i>For NSCC there are Broker/Dealers, certain stock exchanges (for omnibus account reporting), and one CSD.</i></p>
18.1.1.1	Number of general clearing members	Quarterly/ Quarter End	Count	151	74	66	FICC does not distinguish membership categories between members that clear for others and members that are self-clearing. Accordingly, the total number of FICC members are reported as general clearing members and will include all GSD Netting Members, GSD CCIT Members, and MBSD Clearing Members. For NSCC, general clearing members are full service clear for others members.
18.1.1.2	Number of direct clearing members		Count	0	0	82	FICC does not distinguish membership categories between members that clear for others and members that are self-clearing. Accordingly, the total number of FICC members are reported as general clearing members and will include all GSD Netting Members, GSD CCIT Members, and MBSD Clearing Members. For NSCC, direct clearing members are full service self-clearing members.
18.1.1.3	Number of others category (Describe in comments)		Count	0	0	0	Numbers do not include types of members that are not eligible for CCP services: GSD Comparison-Only members, MBSD Electronic Pool Notification (EPN)-only members, and NSCC has several limited membership categories that are not reported here.
18.1.2.1	Number of central bank participants		Count	0	0	0	
18.1.2.2	Number of CCP participants		Count	0	0	0	
18.1.2.3	Number of bank participants		Count	51	15	15	Bank participants include entities classified as Bank or Trust Companies
18.1.2.4	Number of other participants (Describe in comments)		Count	100	59	133	Other participant types include Broker/Dealer, Fund Company, Futures Commission Merchant, Government Securities Issuer, Insured Credit Union, Central Securities Depository (CSD), Clearing Agency/Stock Exchange, and Other

18.1.3.1	Number of domestic participants		Count	111	70	145	Domestic participants include all members whose country of incorporation/formation is the US. US Branches/Agencies of Non-US legal entities are considered to have a Non-US country of incorporation/formation and will be considered Non-US (foreign).
18.1.3.2	Number of foreign participants		Count	40	4	3	Foreign participants include all members whose country of incorporation/formation is a country other than the US. US Branches/Agencies of Non-US legal entities are considered to have a Non-US country of incorporation/formation and will be considered Non-US (foreign).

Disclosure 18.2 - Open Position Concentration								
18.2.1.1	For each clearing service with ten or more members, but fewer than 25 members; Percentage of open positions held by the largest five clearing members, including both house and client, in aggregate	Average End of Day	Quarterly	Percentage	N/A	N/A	N/A	
18.2.1.2		Peak End of Day		Percentage	N/A	N/A	N/A	
18.2.2.1	For each clearing service with 25 or more members; Percentage of open positions held by the largest five clearing members, including both house and client, in aggregate	Average End of Day		Percentage	28.57%	53.86%	37.37%	
18.2.2.2		Peak End of Day		Percentage	32.41%	56.93%	39.20%	
18.2.3.1	For each clearing service with 25 or more members; Percentage of open positions held by the largest ten clearing members, including both house and client, in aggregate	Average End of Day		Percentage	46.47%	74.34%	53.94%	
18.2.3.2		Peak End of Day		Percentage	50.48%	77.04%	56.88%	

Disclosure 18.3 - Initial Margin Concentration								
18.3.1.1	For each clearing service with ten or more members, but fewer than 25 members; Percentage of initial margin posted by the largest five clearing members, including both house and client, in aggregate	Average End of Day	Quarterly	Percentage	0.00%	0.00%	0.00%	Under NSCC's and each of FICC Division's current rules and structure, they do not maintain separate Guaranty Funds. NSCC and each FICC Division collect Clearing Fund deposits from their Members using a risk-based margin methodology. These amounts operate, individually, as the Member's margin, and the aggregate of all such Members' deposits* is referred to, collectively, as the Clearing Fund, which operates as NSCC's and each of FICC Division's default fund. * Member's deposits include excess deposits exceeding the requirement that can be withdrawn by members.
18.3.1.2		Peak End of Day		Percentage	0.00%	0.00%	0.00%	
18.3.2.1	For each clearing service with 25 or more members; Percentage of initial margin posted by the largest five clearing members, including both house and client, in aggregate	Average End of Day		Percentage	35.31%	50.12%	30.04%

18.3.3.1	For each clearing service with 25 or more members; Percentage of initial margin posted by the largest ten clearing members, including both house and client, in aggregate	Average End of Day	Percentage	55.59%	71.15%	44.41%	
18.3.3.2	For each clearing service with 25 or more members; Percentage of initial margin posted by the largest ten clearing members, including both house and client, in aggregate; Average and Peak over the quarter	Peak End of Day	Percentage	57.32%	74.01%	54.83%	

Disclosure 18.4 - Segregated Default Fund Concentration							
18.4.1	For each segregated default fund with ten or more members, but fewer than 25 members; Percentage of participant contributions to the default fund contributed by largest five clearing members in aggregate	Quarterly/Quarter End	Percentage	N/A	N/A	N/A	See Explanatory Note from 18.3
18.4.2	For each segregated default fund with 25 or more members; Percentage of participant contributions to the default fund contributed by largest five clearing members in aggregate		Percentage	N/A	N/A	N/A	
18.4.3	For each segregated default fund with 25 or more members; Percentage of participant contributions to the default fund contributed by largest ten clearing members in aggregate		Percentage	N/A	N/A	N/A	

Disclosure 19.1 - Tiered participation arrangements, measures of concentration of client clearing							
19.1.1	Number of clients (if known)	Quarterly/Quarter End	Count	1	N/A	N/A	See Explanatory Note from 14.1
19.1.2	Number of direct members that clear for clients		Count	48	N/A	66	NSCC: Number denotes members that clear for other Broker/Dealers. GSD: Number denotes members with Indirect Participation through the Sponsoring or Agent Clearing Member Services.
19.1.3.1	Percent of client transactions attributable to the top five clearing members (if CCP has 10+ clearing members); Peak		Percentage	58.85%	N/A	N/A	See Explanatory Note from 14.1
19.1.3.2	Percent of client transactions attributable to the top five clearing members (if CCP has 10+ clearing members); Average		Percentage	51.77%	N/A	N/A	See Explanatory Note from 14.1
19.1.4.1	Percent of client transactions attributable to the top ten clearing members (if CCP has 25+ clearing members); Peak		Percentage	51.34%	N/A	N/A	See Explanatory Note from 14.1
19.1.4.2	Percent of client transactions attributable to the top ten clearing members (if CCP has 25+ clearing members); Average		Percentage	44.64%	N/A	N/A	See Explanatory Note from 14.1

Disclosure 20.1 - FMI Links, Value of Trades							
20.1.1	Value of trades cleared through each link – as a share of total trade values/total notional values cleared in that service	Quarterly	USD \$MM	N/A	N/A	N/A	NSCC does not maintain any interoperable links as described by these items. CDS Clearing and Depository Services, Inc. (the Canadian CSD) is a full service member of NSCC, and is subject to margining and the other requirements of membership as a member. The CDS relationship is described in NSCC's Disclosure Framework under Principle 20. The GSD/CME Cross-Margining Agreement, which is described in GSD's disclosure with respect to PFMI Principle 20, is not an interoperable link as described by sections 20.1 through 20.6 of the quantitative disclosure.

Disclosure 20.2 - FMI Links, Initial Margin or equivalent financial resources provided						See Explanatory Note from 20.1

20.7.1	Value of trades subject to cross margining, by clearing service, as a percentage of total trade values/total notional values cleared	Quarter End	Percentage	5.26%	N/A	N/A	NSCC does not maintain any cross margining arrangements. NSCC does maintain an arrangement with OCC for the settlement of exercised and assigned options, which is described in NSCC’s Disclosure Framework under Principle 20. GSD has a cross-margining arrangement with the Chicago Mercantile Exchange. For GSD under section 20.7, disclosures are quarter end.	
20.7.2	Reduction in total initial margin held by the CCP as a result of cross margining, as a percentage of total initial margin that would otherwise have been held.		Percentage	0.97%		N/A	During the 3rd Quarter of 2025, the average end-of-day savings rate for participating firms receiving savings in the CME-FICC program was 66%. The average daily savings in dollar amounts was \$606.4M during the 3rd quarter. There were 15 firms signed up for the CME-FICC program during the quarter.	
Disclosure 23.1 - Disclosure of rules, key procedures, and market data; Average Daily Volumes								
23.1.1.1	Average Daily Volumes by Asset Class, CCY and OTC/ETD	OTC	Quarterly		520,683	17,120	168,554,579	For GSD/MBSD and NSCC, average daily volume data is based on sides (as opposed to trades). For NSCC: Includes Exchange-based and OTC trades. Omnibus Accounts are excluded for NSCC.
23.1.1.2				NSCC_Exchange		N/A	N/A

Disclosure PRC 2 - Payment Risk Committee Disclosure 2 - Initial Margin Detail								
Initial Margin Breakdown by Component	VaR / Volatility	Quarterly/ Quarter End	USD \$MM	60,843	8,901	8,389	The Value-at-Risk (VaR) and Volatility components are based on the potential price fluctuations of unsettled positions. With the implementation of SVaR for FICC, Margin Proxy is now used as a backup VaR methodology in the event of a significant vendor data disruption.	
	Coverage Component (CC)		USD \$MM	N/A	N/A	45	The Coverage Component is a back-test-like component that is meant to address potential model deficiencies. The Coverage Component is designed by NSCC to mitigate the risks associated with a Member's Required Deposit being insufficient to cover projected liquidation losses to the Coverage Target by adjusting a Member's Required Deposit towards the Coverage Target.	
	Margin Liquidity Deposit (MLA)		USD \$MM	1,901	485	317	The Margin Liquidity Adjustment Charge (MLA), addresses the risk presented to the Clearing Corp when a Member's portfolio contains large Net Unsettled Positions in the particular group of securities with a similar risk profile or in a particular asset type.	
	Blackout Period Exposure Adjustment		USD \$MM	16	N/A	N/A	Blackout Period Exposure: Refers to the exposure to GSD and Reverse Repo participants of the potential overvaluation of MBS Collateral in GCF Repos during the Blackout Period. An adjustment to Clearing Fund Requirements (increase to Repo participants and decrease to Reverse Repo participants) is made based on MBS positions in Member's GCF portfolios during the Blackout Period. The adjustment is based on the average realized pay-down rate transactions. The adjustment is made during the Blackout Period, the first 5 to 7 business days each month.	

Disclosure Reference	Disclosure Description	Frequency	Data Type	FICC		NSCC	Explanatory Notes
				GSD	MBSD		
	Margin Req. Differential (MRD)		USD \$MM	N/A	N/A	3,494	The NSCC MRD is designed to address position-variability risk by estimating the shortfall of end-of-day VaR and mark-to-market compared with the next day's intraday risk and the risk that the next margin call will not be satisfied.
	Mark-to-Market (MtM)		USD \$MM	N/A	N/A	300	As a cash market CCP, NSCC uses a continuous net system where securities within the settlement system are marked daily to the prior night's closing price. Net portfolio debits per Member are collected as part of the Member's Required Deposit; net portfolio credits are not included. Value also includes 'When Issues MtM'. In FICC, GSD and MBSD maintain a pass-through MtM process whereby it collects MTM debits from those Members with debits and passes those to the Members with MTM credits.
	Special Charge		USD \$MM	717	702	298	GSD includes: Back Test Charges, Intraday Supp. Fund Deposit, Minimum Deposit, and Special Charges MBSD includes: Back Test Charges, Intraday MTM Charges, Intraday VaR Charges, Adequate Assurance, and Special Charges NSCC includes: Back Test Charges, Adequate Assurance, Intraday Mark-to-Market Charge, and Intraday VaR Charge.
	Other Charges		USD \$MM	0	4	821	GSD includes: Minimum Requirement Adjustments, Excess Capital Premium, and Falling Below Minimum Requirement MBSD includes: 6 Day Fails Interest, Excess Capital Premium, Falling Below Minimum Requirement, and Minimum Requirement Adjustments NSCC includes: Family Issued Securities, CNS Fails, Non-Return Premiums, Debit Independent Amounts, Clearing Fund Premium, and Minimum Requirement Adjustments
	Portfolio Differential		USD \$MM	1,439	N/A	N/A	Portfolio Differential Charge is designed to mitigate the risks presented to GSD by period-over-period fluctuations in a Member's Margin Portfolio(s) that may occur between the collections of Member's GSD Required Fund Deposits
