NATIONAL SECURITIES CLEARING CORPORATION  
PUBLIC QUANTITATIVE DISCLOSURES FOR CENTRAL COUNTERPARTIES

**Q3 2024**

Revision: Restatement of Disclosure #4.3.5, #4.3.7, and #4.3.15

# TABLE OF CONTENTS

| PRINCIPLE # | DISCLOSURE # | DISCLOSURE TITLE   |
|-------------|--------------|--|
| 4           | 4.1          | Total value of default resources (excluding initial and retained variation margin), split by clearing service if default funds are segregated by clearing service)   |
|             | 4.2          | Kccp   |
|             | 4.3          | Value of pre-funded default resources (excluding initial and retained variation margin) held for each clearing service, in total and split by  |
|             | 4.4          | Credit Risk Disclosures  |
| 5           | 5.1          | Assets eligible as initial margin, and the respective haircuts applied   |
|             | 5.2          | Assets Eligible for pre-funded participant contributions to the default resources, and the respective haircuts applied (if different from 5.1)   |
|             | 5.3          | Results of testing of haircuts   |
| 6           | 6.1          | For each clearing service, total initial margin required, split by house and client (or combined total if not segregated)  |
|             | 6.2          | For each clearing service, total initial margin held, split by house and client  |
|             | 6.3          | Initial Margin rates on individual contracts, where the CCP sets such rates  |
|             | 6.4          | Type of initial margin model used (e.g. portfolio simulation or risk aggregation) for each clearing service and the key model design parameters for each initial margin model applied to that clearing service |
|             | 6.5          | Results of back-testing of initial margin. At a minimum, this should include, for each clearing service and each initial margin model applied to that clearing service   |
|             | 6.6          | Average Total Variation Margin Paid to the CCP by participants each business   |
|             | 6.7          | Maximum total variation margin paid to the CCP on any given business day over the period   |
|             | 6.8          | Maximum aggregate initial margin call on any given business day over the period  |
| 7           | 7.1          | Liquidity Risk   |
|             | 7.2          | Size and composition of any supplementary liquidity risk resources for each clearing service above those qualifying liquid resources above.  |
|             | 7.3          | Liquidity Risk   |
| 12          | 12.1         | Percentage of settlements by value effected using a DvP, DvD or PvP settlement mechanism   |
|             | 12.2         | Percentage of settlements by volume effected using a DvP, DvD or PvP settlement mechanism  |
| 13          | 13.1         | Quantitative information related to defaults   |
| 14          | 14.1         | Total Client Positions held as a share of notional values cleared or of the settlement value of securities transactions  |
| 15          | 15.1         | General business risk  |
|             | 15.2         | General business risk; Financial Disclosures   |

# TABLE OF CONTENTS

| PRINCIPLE # | DISCLOSURE # | DISCLOSURE TITLE   |
|-------------|--------------|--|
|             | 15.3         | General business risk; Income breakdown  |
| 16          | 16.1         | Total cash (but not securities) received from participants, regardless of the form in which it is held, deposited or invested, split by whether it was received as initial margin or default fund contribution |
|             | 16.2         | How total cash received from participants (16.1) is held/deposited/invested, including;  |
|             | 16.3         | Rehypothecation of participant assets (ie non-cash)  |
| 17          | 17.1         | Operational availability target for the core system(s) involved in clearing (whether or not outsourced) over specified period for the system (e.g. 99.99% over a twelve-month period)                          |
|             | 17.2         | Actual availability of the core system(s) over the previous twelve month period  |
|             | 17.3         | Total number of failures   |
|             | 17.4         | Recovery time objective(s)   |

# EXECUTIVE SUMMARY

In February 2015, CPMI-IOSCO issued its final report on Quantitative Disclosure Standards for Central Counterparties (“CCPs”), which provides specific quantitative disclosure requirements for CCPs relative to a number of the PFMI principles. These disclosures are intended to complement the narrative disclosures included in the CPMI-IOSCO Disclosure Framework\*. This document contains the quantitative disclosures for the two divisions of the Fixed Income Clearing Corporation (“FICC”) — the Government Securities Division (“GSD”) and Mortgage-Backed Securities Division (“MBSD”) — and the National Securities Clearing Corporation (“NSCC”). FICC and NSCC are wholly owned subsidiaries of The Depository Trust & Clearing Corporation (“DTCC”).

The attached disclosures include, in addition to those required by CPMI-IOSCO, some supplemental disclosures as proposed by the Payments Risk Committee’s Recommendations for Supporting Clearing Member Due Diligence of Central Counterparties (Feb 2013).

The information provided in this disclosure is reported as of the dates specified. For further information, please contact [CPMI-IOSCO\\_Quant@dtcc.com](mailto:CPMI-IOSCO_Quant@dtcc.com).

\* The Disclosure Frameworks for FICC and NSCC can be found at [www.dtcc.com](http://www.dtcc.com)

# Q3 2024 SUPPLEMENTAL EXPLANATORY NOTE

## Management Note

T+1 was introduced in the U.S. on Tuesday, May 28, and the industry and NSCC has been operating on an accelerated settlement cycle since then. The U.S. equity markets rose during the third quarter of 2024, with the S&P 500 index increasing approximately 5.5%. While Treasury yields continued their downward trend from April, though stabilized for the end of Q3 following the half-point cut to the Federal Funds Rate coming out of the 09/18/2024 Federal Open Market Committee meeting. Yields on U.S treasuries ended the quarter lower, with the 10-year U.S. Treasury yield down from 4.48% at the beginning of July to 3.80% at quarter end.

## **FICC-Government Securities Division (GSD)**

At the end of the third quarter of 2024, GSD’s 12-month backtesting coverage level was 99.7%. The 1-month coverage ratio at GSD was 98.36% for July, 99.82% for August, and 99.92% for September. The largest deficiency for the quarter totaled \$441.4MM observed on 07/30/2024 and was driven by market movement after the release of weaker-than-expected ISM Manufacturing Purchasing Managers Index (ISM PMI) and non-farm payrolls data in August. The median backtesting deficiency for the quarter was \$18.0MM.

## **FICC-Mortgage-Backed Securities Division (MBSD)**

At the end of the third quarter of 2024, MBSD’s 12-month backtesting coverage level was 99.5%. The 1-month coverage ratio at MBSD was 98.98% for July, 100.00% for August, and 99.83% for September. The largest deficiency for the quarter totaled \$37.8MM observed on 07/30/2024 and was driven by market movement after the release of weaker-than-expected ISM Manufacturing Purchasing Managers Index (ISM PMI) and non-farm payrolls data in August. The median backtesting deficiency for the quarter was \$2.8MM.

## **National Securities Clearing Corporation (NSCC)**

At the end of the third quarter of 2024, NSCC’s 12-month backtesting coverage level was 99.9%, with the 1-month coverage ratio for July at 99.86%, August at 99.96%, and September at 99.92%. The median backtesting deficiency for the quarter was \$11.2MM. The largest deficiency for the quarter was \$240.3MM, which occurred on 09/26/2024, driven by off-the-market after hours trading activity.

## Q3 2024 SUPPLEMENTAL EXPLANATORY NOTE

### **Liquidity Results**

GSD, MBSD, and NSCC did not experience a default event nor did any Member fail to satisfy payment obligations in Q3 2024. A simulated default liquidity sufficiency shortfall was observed for NSCC in Q3 2024. Further details are below.

For GSD and MBSD, the values are estimated liquidity obligations, post netting, that are based on trades that are due to settle the following business day plus funds-only settlement ("FOS"). For NSCC, the values are estimated liquidity obligations that are based on obligations throughout the settlement cycle, which moved from a T+2 to T+1 settlement cycle on May 28, 2024, plus the Long Allocation and Cross Account Liquidity Methodology ("CALM") offsets. The total reflects, where relevant, intraday and multiday payment obligations that could be caused by the default of any single participant and its affiliates (including transactions cleared for indirect participants) in extreme but plausible market conditions.

The liquidity results reflect NSCC's potential liquidity obligations in a Member default scenario. In a non-default scenario, NSCC's Members have cash obligations for all securities deliveries (buy positions). Those cash obligations are netted with cash received for all securities deliveries (sell positions). If a portfolio is balanced with buys/sells, these settlement amounts will largely offset.

In a default scenario, NSCC is responsible for the receipt of securities from, and payment of cash to, the contra side Members (buy positions). This represents the exposure that is published in this report. NSCC may also need to source securities that the defaulting Member was unable to deliver (sell positions). The liquidity obligations of the sell positions pair-off, as NSCC would exchange settlement proceeds between the two contra side Members. As such, the buy positions drive the potential default liquidity risk that is posed to NSCC, since NSCC would be responsible for the payment of cash required to settle those purchases. Therefore, NSCC's conservative liquidity results derived from a default scenario are not comparable to the non-default settlement obligations of its Members.

Liquidity results also reflect the fact that NSCC receives option activity from the Options Clearing Corporation ("OCC") each business day, but activity on non-expiry dates is not as significant as the activity observed around standard expiration periods. Liquidity obligations are conservatively calculated and liquidity resources are measured assuming the guarantee for OCC options has been transferred to NSCC. Liquidity risk measurement is calibrated extremely conservatively to address uncertainty of potential outcomes; resources are likely to increase during periods of stress over a 4-day default period, but no such increases are considered as potential risk mitigation.

NSCC observed one simulated default liquidity sufficiency shortfall totaling \$3.98BN during September option expiration. This shortfall was addressed by the payment of a Supplemental Liquidity Deposit ("SLD") along with OCC's commitment to provide liquidity resources associated with OCC activity, in the form of a Guaranty Substitution Payment under the Amended and Restated Stock Options and Futures Settlement Agreement (the "OCC-NSCC Accord"), in the event of a member default. NSCC uses SLD, a payment obligation, determined by whether the daily liquidity obligation on a business day exceeds the sum of NSCC's qualifying liquid resources ("QLR") available to NSCC, after the application of a wide range of stressed market assumptions. The SLD payment obligation is based on the calculated QLR and actual liquidity exposure over the upcoming settlement cycle that a Member's daily activity would pose to NSCC on that particular day in the event of that Member's default. NSCC held SLD on deposit one time in Q3. SLD is part of NSCC's diversified set of liquidity resources. QLR includes cash deposits to the NSCC Clearing Fund; proceeds of the issuance and private placement of (a) short-term, unsecured notes in the form of commercial paper and extendable notes and (b) term debt; and cash that would be obtained by drawing on NSCC's committed 364-day credit facility with a consortium of banks. The SLD rule is Rule 4A in the NSCC rulebook that can be accessed via [https://www.dtcc.com/~media/Files/Downloads/legal/rules/nscc\\_rules.pdf](https://www.dtcc.com/~media/Files/Downloads/legal/rules/nscc_rules.pdf). Full text of the SLD filings may be obtained by visiting the DTCC website at [www.dtcc.com/legal/sec-rule-](http://www.dtcc.com/legal/sec-rule-) filings.

| Disclosure Reference   | Disclosure Description  |  | Frequency                 | Data Type                 | FICC     |        | NSCC   | Explanatory Notes   |  |
|--|---|--|---------------------------|---------------------------|----------|--------|--------|---|--|
|  |   |  |                           |                           | GSD      | MBSD   |        |   |  |
| Disclosure 4.1 - Total value of default resources (excluding initial and retained variation margin), split by clearing service if default funds are segregated by clearing service |   |  |                           |                           |          |        |        |   |  |
| 4.1.1  | Prefunded - Own Capital Before  |  | Quarterly/<br>Quarter End | USD \$MM                  | 94       |        | 133    | The Company maintains an amount referred to as the corporate contribution, to be applied to losses of the Company as provided in the clearing agency rules. The amount of the corporate contribution is generally equal to 50% of the Company's general business risk capital requirement.  |  |
| 4.1.2  | Prefunded - Own Capital Alongside   |  |                           | USD \$MM                  | N/A      | N/A    | N/A    |   |  |
| 4.1.3  | Prefunded - Own Capital After   |  |                           | USD \$MM                  | N/A      | N/A    | N/A    |   |  |
| 4.1.4  | Prefunded - Aggregate Participant Contributions - Required  |  |                           | USD \$MM                  | 56,345   | 8,756  | 9,567  | NSCC and each FICC Division calculates and collects Clearing Fund from its Members using a risk-based margin methodology. These amounts (a Member's "Required Fund Deposit") operate as the Member's margin, and the aggregate of all such Members' deposits is, collectively, the Clearing Fund, which operates as NSCC's/FICC (with respect to each division's) default fund. For NSCC, on May 28, 2024, the US cash equities markets moved to a T+1 settlement cycle. Accordingly, after that date, the clearing fund has been calculated to take into account the shortened settlement cycle. |  |
| 4.1.5  | Prefunded - Aggregate Participant Contributions - Post-Haircut Posted   |  |                           | USD \$MM                  | 68,998   | 10,727 | 10,791 |   |  |
| 4.1.6  | Prefunded - Other   |  |                           | USD \$MM                  | N/A      | N/A    | N/A    |   |  |
| 4.1.7  | Committed - Own/parent funds that are committed to address a participant default (or round of participant defaults)   |  |                           | USD \$MM                  | N/A      | N/A    | N/A    |   |  |
| 4.1.8  | Committed - Aggregate participant commitments to address an initial participant default (or initial round of participant defaults)  |  |                           | USD \$MM                  | N/A      | N/A    | N/A    |   |  |
| 4.1.9  | Committed - Aggregate participant commitments to replenish the default fund to deal with a subsequent participant default (or round of participant defaults) after the initial participant default (or round of participant defaults) has been addressed. |  |                           | USD \$MM                  | N/A      | N/A    | N/A    |   |  |
| 4.1.10   | Committed - Other   |  |                           | USD \$MM                  | N/A      | N/A    | N/A    |   |  |
| Disclosure 4.2 - Kccp - Quarter End  |   |  |                           |                           |          |        |        |   |  |
| 4.2.1  | Kccp - Kccp need only be reported by those CCPs which are, or seek to be a "qualifying CCP" under relevant law.   |  | Quarterly                 | USD \$MM                  | 943      | 93     | N/A    | For FICC, the reported values follow the Standardized Approach for Counterparty Credit Risk (SA-CCR) rule's guidelines for calculation.   |  |
| Disclosure 4.3 - Value of pre-funded default resources (excluding initial and retained variation margin) held for each clearing service  |   |  |                           |                           |          |        |        |   |  |

|   |  |                                     |                            |            | GSD                             | MBSD                            |                          |   |
| 6.4.1   | Type of initial margin model used (e.g. portfolio simulation or risk aggregation) for each clearing service and the key model design parameters for each initial margin model applied to that clearing service |                                     | Update as changes are made |            | Historical Simulation + Haircut | Historical Simulation + Haircut | Parametric VaR + Haircut |   |
| Disclosure 6.5 - Results of back-testing of initial margin. At a minimum, this should include, for each clearing service and each initial margin model applied to that clearing service |  |                                     |                            |            |                                 |                                 |                          |   |
| 6.5.1.1   | Number of times over the past twelve months that margin coverage held against any account fell below the actual mark-to-market exposure of that member account – based on daily back-testing results           | Once-a-day/<br>Previous 12 Months   | Quarterly                  | Count      | 98                              | 73                              | 21                       |   |
| 6.5.2   | Number of observations ([Number of accounts * number of days])   | Previous 12 Months                  |                            | Count      | 31,038                          | 15,328                          | 31,905                   |   |
| 6.5.3   | Achieved coverage level [aggregate CCP-level backtest coverage]  | Previous 12 Months                  |                            | Percentage | 99.68%                          | 99.52%                          | 99.93%                   | Aggregate CCP-level backtest coverage (SEC Mthly Back Test report)  |
| 6.5.4   | Where breaches of initial margin coverage (as defined in 6.5(a)) have occurred, report on size of uncovered exposure   | Peak Size/<br>Previous 12 Months    |                            | USD \$MM   | 441                             | 140                             | 240                      | Peak Coverage Level at CC Level over the last 12-month at the quarter-end   |
| 6.5.5   |  | Average Size/<br>Previous 12 Months |                            | USD \$MM   | 25                              | 12                              | 15                       | Average magnitude of Backtest deficiencies over last 12 months  |
| Disclosure 6.6 - Average Total Variation Margin Paid to the CCP by participants each business   |  |                                     |                            |            |                                 |                                 |                          |   |
| 6.6.1   | Average Total Variation Margin Paid to the CCP by participants each business day   | Average                             | Quarterly                  | USD \$MM   | 10,283                          | 451                             | 488                      | For GSD and MBSD, VM is a cash pass-through process across the Members; for NSCC, VM charges are included as part of the Clearing Fund requirements. MTM debits were aggregated across all Members to reflect the variation margin paid to all Members. |
| Disclosure 6.7 - Maximum total variation margin paid to the CCP on any given business day over the period   |  |                                     |                            |            |                                 |                                 |                          |   |
| 6.7.1   | Maximum total variation margin paid to the CCP on any given business day over the period   | Maximum                             | Quarterly                  | USD \$MM   | 13,878                          | 1,762                           | 2,393                    | See Explanatory Note from 6.6   |
| Disclosure 6.8 - Maximum aggregate initial margin call on any given business day over the period  |  |                                     |                            |            |                                 |                                 |                          |   |
| 6.8.1   | Maximum aggregate initial margin call on any given business day over the period  | Maximum                             | Quarterly                  | USD \$MM   | 6,037                           | 1,695                           | 8,540                    | Amount represents the largest aggregate deficit over amounts on deposit. This is the actual call made, to be reduced by any excess collateral that was held. Call amount would be inclusive of any intraday calls made.                                 |
| Disclosure 7.1 - Liquidity Risk   |  |                                     |                            |            |                                 |                                 |                          |   |
| 7.1.1   | State whether the clearing service maintains sufficient liquid resources to 'Cover 1' or 'Cover 2'.  |                                     | Quarterly/<br>Quarter End  |            | Cover 1                         | Cover 1                         | Cover 1                  |   |
| 7.1.2   | Size and composition of qualifying liquid resources for each clearing service; (a) Cash deposited at a central bank of issue of the currency concerned   |                                     |                            | USD \$MM   | 17,158                          | 2,995                           | 21,107                   |   |

| Disclosure Reference | Disclosure Description   |                          | Frequency | Data Type | FICC   |        | NSCC  | Explanatory Notes   |
|----------------------|--|--------------------------|-----------|-----------|--------|--------|-------|---|
|                      |  |                          |           |           | GSD    | MBSD   |       |   |
| 7.1.3                | Size and composition of qualifying liquid resources for each clearing service; (b) Cash deposited at other central banks   |                          |           | USD \$MM  | 0      | 0      | 0     |   |
| 7.1.4                | Size and composition of qualifying liquid resources for each clearing service; (c) Secured cash deposited at commercial banks (including reverse repo)   | Repo Only                |           | USD \$MM  | 0      | 0      | 0     |   |
| 7.1.5                | Size and composition of qualifying liquid resources for each clearing service; (d) Unsecured cash deposited at commercial banks  | Commercial Bank Deposits |           | USD \$MM  | 500    | 125    | 1,350 |   |
|                      |  | Money Market Funds       |           | USD \$MM  | 0      | 0      | 0     |   |
|                      |  | US Treasury Bills        |           | USD \$MM  | 0      | 0      | 0     |   |
| 7.1.6                | Size and composition of qualifying liquid resources for each clearing service; (e) secured committed lines of credit (ie those for which collateral/security will be provided by the CCP if drawn) including committed foreign exchange swaps and committed repos  |                          |           | USD \$MM  | 96,649 | 77,808 | 9,600 | For FICC, amount represents the assigned total amount of rules-based facility, Capped Contingency Liquidity Facility ("CCLF") for the reported quarter. For NSCC, the amount represents a secured line of credit with a syndicate of lenders.   |
| 7.1.7                | Size and composition of qualifying liquid resources for each clearing service; (f) unsecured committed lines of credit (ie which the CCP may draw without providing collateral/security)   |                          |           | USD \$MM  | N/A    | N/A    | N/A   |   |
| 7.1.8                | Size and composition of qualifying liquid resources for each clearing service; (g) highly marketable collateral held in custody and investments that are readily available and convertible into cash with prearranged and highly reliable funding arrangements even in extreme but plausible market conditions |                          |           | USD \$MM  | N/A    | N/A    | N/A   |   |
| 7.1.9                | Size and composition of qualifying liquid resources for each clearing service; (h) other   |                          |           | USD \$MM  | N/A    | N/A    | 0     | <p>For GSD and MBSD, the portfolio of a defaulting member, comprised of highly marketable collateral would also be available as a liquidity resource. Value and composition of that portfolio would vary by day and by member. For GSD/MBSD, amount represents the Repo Value of Underlying Securities.</p> <p>NSCC's Supplemental Liquidity Deposit ("SLD") program provides for additional rules-based liquidity. Option expiry settlement cycles typically present elevated liquidity needs to NSCC. Members may be required to provide additional funding based on historical activity. Sizing of supplemental liquidity resources will vary based on the historical activity presented by NSCC's largest members as well as market dynamics during the current settlement cycle. As of 9/30/24 there were no SLD deposits on hand. Please see Supplemental Note for additional information.</p> <p>Resources reported in Section 7.1 are as of 9/30/24 and do not correspond to the dates of the actual largest obligations.</p> |
| 7.1.10               | State whether the CCP has routine access to central bank liquidity or facilities.  |                          |           |           | N/A    | N/A    | N/A   |   |
| 7.1.11               | Details regarding the schedule of payments or priority for allocating payments, if such exists, and any applicable rule, policy, procedure, and governance arrangement around such decision making.  |                          |           |           | N/A    | N/A    | N/A   | No schedule of payments or priority for allocating payments exists.   |

Disclosure 7.2 - Size and composition of any supplementary liquidity risk resources for each clearing service above those qualifying liquid resources above.

| Disclosure Reference  | Disclosure Description  | Frequency                     | Data Type  | FICC    |         | NSCC    | Explanatory Notes   |
|---|---|-------------------------------|------------|---------|---------|---------|---|
|   |   |                               |            | GSD     | MBSD    |         |   |
| 7.2.1   | Size and composition of any supplementary liquidity risk resources for each clearing service above those qualifying liquid resources in 7.1   | Quarterly/<br>Quarter End     | USD \$MM   | 0       | 0       | N/A     | FICC has entered into uncommitted master repurchase agreements (“MRAs”) which it may look to as a liquidity source in addition to the resources discussed in the explanatory note from 7.1. These are not designated as qualifying liquid resources. Amounts available under the MRAs cannot be quantified. |
| Disclosure 7.3 - Liquidity Risk   |   |                               |            |         |         |         |   |
| 7.3.1   | Estimated largest same-day and, where relevant, intraday and multiday payment obligation in total that would be caused by the default of any single participant and its affiliates (including transactions cleared for indirect participants) in extreme but plausible market conditions                  | Forward looking/<br>Quarterly | USD \$MM   | 83,399  | 29,099  | 46,246  | See Supplemental Note   |
| 7.3.2   | Number of business days, if any, on which the above amount exceeded its qualifying liquid resources (identified as in 7.1, and available at the point the breach occurred), and by how much.  | Quarterly                     | Bus. Days  | 0       | 0       | 1       | See Supplemental Note   |
| 7.3.3   |   |                               | USD \$MM   | 0       | 0       | 3,978   | See Supplemental Note   |
| 7.3.4   | Actual largest intraday and multiday payment obligation of a single participant and its affiliates (including transactions cleared for indirect participants) over the past twelve months; Peak day amount in previous twelve months  | Previous 12 Months            | USD \$MM   | 83,399  | 31,794  | 46,246  | See Supplemental Note   |
| 7.3.5   | Estimated largest same-day and, where relevant, intraday and multiday payment obligation in each relevant currency that would be caused by the default of any single participant and its affiliates (including transactions cleared for indirect participants) in extreme but plausible market conditions | Forward looking/<br>Quarterly | USD \$MM   | 83,399  | 29,099  | 46,246  | See Supplemental Note   |
| 7.3.6   | Number of business days, if any, on which the above amounts exceeded its qualifying liquid resources in each relevant currency (as identified in 7.1 and available at the point the breach occurred), and by how much   | Quarterly                     | Bus. Days  | 0       | 0       | 1       | See Supplemental Note   |

| Disclosure 17.1 - Operational availability target for the core system(s) involved in clearing (whether or not outsourced) over specified period for the system |  |  |  |  |  |  |  |
|--|--|--|--|--|--|--|--|
|--|--|--|--|--|--|--|--|

| Disclosure Reference  | Disclosure Description  | Frequency | Data Type        | FICC           |                | NSCC           | Explanatory Notes  |
|---|---|-----------|------------------|----------------|----------------|----------------|--|
|   |   |           |                  | GSD            | MBSD           |                |  |
| 17.1.1  | Operational availability target for the core system(s) involved in clearing (whether or not outsourced) over specified period for the system        | Quarterly | Percentage       | 99.60%         | 99.60%         | 99.60%         | This target and the actual results below are calculated at the individual product-line level and then averaged across all of the systems identified below, in accordance with the established calculation for the applicable SLA.  |
| Disclosure 17.2 - Actual availability of the core system(s) over the previous twelve month period |   |           |                  |                |                |                |  |
| 17.2.1  | Actual availability of the core system(s) over the previous twelve month period   | Quarterly | Percentage       |                |                | 99.87%         | Regulation Systems Compliance and Integrity (Regulation SCI) events for NSCC, GSD, and MBSD over the previous twelve month period are reviewed for Disclosure 17.3 reporting. Regulation SCI events that impact core systems used in clearing that enable the acceptance and novation of trades, and enable the calculation of margin and settlement obligations are assessed by Risk Management, Product Management, Regulation SCI personnel, and Legal to confirm total number of incidents and duration of failures. Incidents that do not result in a direct business impact to clients are not reported as a failure for Disclosure 17.3. During Q1 2023, processing issues were encountered on DTCC's mainframe impacting ATP and other systems for 4 hours and 34 minutes. In Q4 2022, on two separate occasions, Clearing Fund Letters were regenerated after the client delivery SLA time by 2 hours and 10 minutes and then 8 minutes. In another instance, a network disruption caused the delay of settling bank acknowledgement by 1 hour and 54 minutes. Manual processing caused the unavailability of intraday VaR calculations for 2 hours and 45 minutes. |
| Disclosure 17.3 - Total number of failures  |   |           |                  |                |                |                |  |
| 17.3.1  | Total number of failures and duration affecting the core system(s) involved in clearing over the previous twelve month period (Duration of Failure) | Quarterly | Count / hh:mm:ss | 0 / 0:00:00    |                |                | Regulation Systems Compliance and Integrity (Regulation SCI) events for NSCC, GSD, and MBSD over the previous twelve month period are reviewed for Disclosure 17.3 reporting. Regulation SCI events that impact core systems used in clearing that enable the acceptance and novation of trades, and enable the calculation of margin and settlement obligations are assessed by Risk Management, Product Management, Regulation SCI personnel, and Legal to confirm total number of incidents and duration of failures. Incidents that do not result in a direct business impact to clients are not reported as a failure for Disclosure 17.3.  |
