

## **Important Notice**

## The Depository Trust & Clearing Corporation

Z #:	0278
Date:	February 28, 2025
To:	All Clients
Category:	Service Updates
From:	Product Management
Attention:	All DTC, FICC, NSCC, and WMS Clients
Subject:	Access MyDTCC Services with New, Secure Authentication Method

As part of DTCC's commitment to enhancing security and improving our clients' digital user experience, we offer Federated Identity Management/Federated Single Sign-On (SSO) for access to MyDTCC, our authenticated client portal.

## **Key Benefits of Federated SSO:**

**Enhanced User Experience:** Federated users no longer require a DTCC specific password eliminating the need to enter a password to access MyDTCC.

**Strengthened Security:** Federated SSO allows client organizations to enforce their own security policies when accessing their data, removes the risk of password compromise and enhances controls associated with user offboarding.

Federated SSO is now the preferred authentication method for all clients. Starting in 2026, DTCC will require clients to authenticate via Federated SSO. We encourage you to begin having discussions with your IAM/SSO and/or business contacts in your organization to ensure readiness. We also recommend initiating conversations with DTCC regarding your plans to adopt Federated SSO.

For more information on Federated SSO or instructions on how to submit a support request, please visit the DTCC Learning Center.
