<b>Subject:</b>	<b>ETF Web Technology Platform Upgrade</b>

DTCC is implementing a technology platform upgrade for the ETF Web application as part of its ongoing modernization efforts.

This upgrade transitions ETF Web from the legacy WebSphere Application Server (WAS) to a modern architecture leveraging Apache Tomcat and Java 17, with updated frameworks aligned to current industry standards.

**Key Highlights**

- Migration from WAS to Tomcat-based architecture
- Upgrade to Java 17 to support performance, security, and long-term sustainability
- Modernization of underlying frameworks and dependencies

**Client Impact**

- No functional changes to existing workflows or business processes
- Updated access URLs as part of the platform migration:

**Internal (DTCC network – .org):**

- WAS: <https://portal.dtcc.org/etf/etfweb/ETF/>
- Tomcat: <https://cld.dtcc.org/etfweb/>

**External (Client-facing – .com):**

- WAS: <https://portal.dtcc.com/etf/etfweb/ETF/>
- Tomcat: <https://cld.dtcc.com/etfweb/>

The .com URL is accessible outside the DTCC network and should be used by clients.

Clients who have bookmarked or favorited the existing links should take note of these updates. In some cases, it may be necessary to remove older saved links and re-save the new URLs to ensure proper access going forward.

Clients are encouraged to review updated connectivity and technical documentation as it becomes available.

### **Timeline**

- Planned production release: June 11, 2026

### **Next Steps**

DTCC will provide additional details on connectivity, URLs, and deployment timelines, and will publish updated documentation via the DTCC Learning Center. For questions or support, please contact your DTCC Relationship Manager or the NSCC Integration team.

We appreciate your continued partnership as we enhance the ETF platform.
