<b>Subject:</b>	DTC Business Continuity and Disaster Recovery – Q1 & Q2 2026 Testing & Rotation Schedule – Revised

The Depository Trust Company’s (“DTC”) resilience strategy is focused on strengthening our capabilities through leading practices and a modernized and scalable architecture. Currently, DTCC has two data centers with the primary located in Brooklyn, NY and the backup in Dallas, TX. In 2026, DTC is evolving its disaster recovery capabilities to enable production processing to operate live out of the Dallas data center through periodic rotation. In preparation for this, normal production schedules will be impacted, as described below.

To date, validation of the ability for Dallas to operate production processing has been conducted through simulations of planned and unplanned events. To demonstrate repeatable and sustainable resiliency, a full production relocation of the data centers will be executed periodically beginning in January 2026 with the initial relocation from Brooklyn to Dallas and the return to Brooklyn in March 2026.

In preparation for the production events, DTC has established multiple tests in the first and second quarters of 2026, to exercise this capability. The following represent the planned 2026 dates for testing and data center production swings:

Date	Event	Anticipated Impact
January 10, 2026	Internal Test	N/A
January 17, 2026	Data Center Production Relocation	N/A
February 7, 2026	Internal Test	N/A
February 28, 2026	Internal Test	N/A
March 14, 2026	Data Center Production Relocation	N/A
May 2, 2026	Internal Test	N/A

During these weekends, DTC’s systems will be unavailable for processing between 5:00 AM (ET) Saturday and 12:00 PM (ET) Sunday. Regular processing and access will resume immediately following each exercise.

We will share details about the remaining 2026 scheduled activities as they become available.
