

## **Buy-Side: Alternative Asset Manager**

**Profile Description:** Actively managed funds who focus on various trading strategies, including Basis Trading, Relative Value (levered), Macro Strategy (long term, directional), Multi-strategy.

Trading Activity: Trading products can include Equities, Fixed Income, Futures Swaps and FX.

## **Key Considerations Related to Central Clearing**

#### **Access to Cross-Margining**

Utilize cross-margining arrangements where possible with prime brokers as well as among clearing agencies to optimize margin requirements.

#### **Done-Away Support**

Need for margin optimization for intermediated activity likely to necessitate "done-away" clearing support by intermediaries.

#### **Cost of Margin and Margin Transparency**

Margin cost, frequency, and eligible collateral allowed to post; need to have tools to calculate margin that could be collected for cleared activity.

#### **Pricing**

Sensitive to cost of clearing (e.g., clearing agency fees, intermediary fees, CCLF) as related to trading capital.

# Recommended Access Model

## **Sponsored**

Recommended based on feedback from similar firms evaluating their USTC requirements

### **Key Access Model Considerations**

- If Alternative Asset Manager acts as an indirect participant (i.e., client) in clearing,
   Sponsored Access provides:
  - o Balance sheet capacity due to netting capabilities
  - o "Done-away" execution capabilities
  - Future capabilities for client level cross-margining if Alternative Asset Manager posts margin to clearing agency (as opposed to Sponsoring Member)
  - Legal relationship with the clearing agency
- ACM Access (Alternative) May be of interest for "done-away" activity due to "light-touch" clearing agency onboarding for Alternative Asset Manager and/or for Alternative Asset Managers not from FICC-approved jurisdictions.
- Direct Access (Alternative) May be of interest if Alternative Asset Manager has
  the financial and operational capacity to interoperate with clearing agency;
  provides access to cross-margining under current program with CME.
