

Energy & Environmental Policy

The Depository Trust & Clearing Corporation (DTCC) is committed to protecting the environment and improving energy performance across the facilities and operations within the scope of its Energy & Environmental Management System.

As an occupier of office space and mission critical facilities globally, DTCC's leadership establishes this Energy & Environmental Policy to provide direction and a framework for setting and reviewing environmental and energy objectives and targets, aligned with DTCC's strategic direction and business objectives.

DTCC is:

Dedicated to implementing and supporting the ISO 14001:2015 and ISO 50001:2018 Energy & Environmental Management System to protect the environment, prevent pollution, and improve energy performance.

Trustworthy in ensuring the availability of accurate information and appropriate resources to establish, achieve, and review energy and environmental objectives and targets, while fulfilling applicable legal and other compliance obligations.

Committed to procuring energy efficient products and services, and to designing new, modified, and renovated facilities, equipment, systems, and energy using processes that support energy performance improvement and environmental protection.

Continually improving environmental and energy performance, and the effectiveness of the Energy & Environmental Management System, in alignment with DTCC's strategic direction.

This policy is maintained as documented information, communicated to all persons working under DTCC's control, made available to interested parties, and reviewed periodically to ensure its ongoing suitability and alignment with DTCC's strategic direction.
